The Imperial Experience In Sub Saharan Africa Since 1870:

The Imperial Experience in Sub-Saharan Africa Henry S. Wilson, 1977 **The Imperial Experience in Sub-Saharan Africa Since 1870** Henry S. Wilson, 1977 The Imperial Experience in Sub Saharan Africa since 1870 was first published in 1977 Through case studies illustrating the differential impact of European domination on African societies Mr Wilson surveys sub Saharan Africa from 1870 to the 1970s He describes the continent and its regions analyzes the colonial regimes of Britain France Germany Belgium and Portugal and discusses African resistance and involvement His study demonstrates how the Europeans inadvertently delineated what would constitute within two generations the outlines of independent African states After the scramble the self confident imperialists had hoped to control African development with low cost administrative and educational schemes under the illusion that they had abundant time But as this account shows their timetables were subverted by the spread of western education through missionary activity and laissez faire economic development often on African initiatives The end of empire was signaled by the growth of African nationalism combined with European self destruction in two world wars and the emergence of the United States and Soviet Russia as superpowers Led by Britain the European states instituted abrupt decolonization policies which culminated in the Belgian withdrawal from the Congo and the collapse of Portuguese resistance to African liberation movements In southern Africa where Africans lost their land to European settlers white domination has been more durable the author points out and Africans still struggle for self determination **Europe and the World in the Age of Expansion: The imperial experience in sub-Saharan Africa since 1870** Boyd C. Shafer, 1974 **The Routledge Companion to World History since 1914** Chris Cook, John Stevenson, 2006-01-27 The Routledge Companion to World History since 1914 is an outstanding compendium of facts and figures on World History Fully up to date reliable and clear this volume is the indispensable source of information on a thorough range of topics such as the Arab Israeli conflict anti semitism and the Holocaust all the world s major famines and natural disasters since 1914 whether all countries of the world have a king president prime minister or other governance GNP of the world s major states year by year biographies of key figures civil rights movements the Vietnam War the rise of terrorism globalization Thematically presented the book covers topics relevant from the First World War to the Iraq war of 2003 and from post colonial Africa to conflicts and movements in Southeast Asia With maps chronologies and full bibliography this user friendly reference work is the essential companion for students of history politics and international relations and for all those with an interest in world history [Africa at the Millennium](#) NA NA, 2016-04-30 This book is aimed at providing a framework for African issues in the 21st century Apart from its African centered approach it argues that previously marginalized areas of research require in depth study It also introduces new areas of interest absent in existing works The book pays particular attention to the relative success of African countries and regions in their attempt to find solutions to Africa s problems and the changing role in African states in international relations **Foundations of the**

McAlister, 1984 Spanish and

Portuguese expansion substantially altered the social political and economic contours of the modern world In his book Lyle McAlister provides a narrative and interpretive history of the exploration and settlement of the Americas by Spain and Portugal McAlister divides this period and the book into three parts First he describes the formation of Old World societies with particular attention to those features that influenced the directions and forms of overseas expansion Second he traces the dynamic processes of conquest and colonization that between 1492 and about 1570 firmly established Spanish and Portuguese dominion in the New World The third part deals with colonial growth and consolidation down to about 1700 McAlister s main themes are the post conquest territorial expansion that established the limits of what later came to be called Latin America the emergence of distinctively Spanish and Portuguese American societies and economies the formation of systems of imperial control and exploitation and the ways in which conflicts between imperial and American interests were reconciled This comprehensive history with its extensive bibliographic essay and attention to historiographic issues will be a standard reference for students and scholars of the period **Theories of Development** Peter Preston, 2012-12-06 Dr

Preston s book first published in 1982 presents a critical history of development studies since the Second World War linking the recent neo Marxist debate with the whole tradition in the field going back to the work of economists like Arthur Lewis He identifies a series of schools and evaluates their contribution supplying in each case a careful analysis informed by the sociology of knowledge of the work of its leading theorists His final assessment draws on the critical theory of Habermas arguing that social theorising is essentially practical a matter of the construction criticism and comparative ranking of ideologies and that theorists should therefore consider what it makes sense for them to do or say given their circumstances and the problems they address **What is Europe?.** , 1993 *The Commonwealth of Nations* W. David McIntyre, 1977 The

author a professor of history at the University of Canterbury Christchurch New Zealand presents a comprehensive survey of Commonwealth history from the time of soul searching about the future of the British Empire which marked the middle years of Queen Victoria's reign to the year when Britain decided to enter the European Community The account is divided in three periods 1869 to 1917 1917 to 1941 and 1942 to 1971 Within each period a four fold thematic divisions is followed Dominions Indian Empire crown colonies and protectorates *Uncertain Dimensions* Raymond F. Betts, 1985 Examines the ruling and development of colonies in Africa and Southeast Asia by Great Britain and France during the period between the world wars

Islands and Empires Ernest Stanley Dodge, 1976 Islands and Empires was first published in 1976 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions This is the first one volume account of the massive impact of Western civilization on the Pacific Islands and the Far East principally China and Japan The effects on the two areas were very different since in the case of the islands contact was with peoples who were still in the Stone Age while in the Far East Westerners came up against sophisticated civilizations more ancient and mature than their own Because of these differences the book is divided into two sections the first dealing with the Pacific Islands and the second with the East Asian mainland Reverse influences those of the Eastern cultures on the West are also discussed *A Guide to Archival Accessions at the Borthwick Institute, 1981-1996* Borthwick Institute of Historical Research, 1997 *Nationalism and the State* John Breuilly, 1994-02 Since its publication this important study has become established as a central work on the vast and contested subject of modern nationalism Placing historical evidence within a general theoretical framework John Breuilly argues that nationalism should be understood as a form of politics that arises in opposition to the modern state In this updated and revised edition he extends his analysis to the most recent developments in central Europe and the former Soviet Union He also addresses the current debates over the meaning of nationalism and their implications for his position Breuilly challenges the conventional view that nationalism emerges from a sense of cultural identity Rather he shows how elites social groups and foreign governments use nationalist appeals to mobilize popular support against the state Nationalism then is a means of creating a sense of identity This provocative argument is supported with a wide ranging analysis of pertinent examples national opposition in early modern Europe the unification movement in Germany Italy and Poland separatism under the Hapsburg and Ottoman empires fascism in Germany Italy and Romania post war anti colonialism and the nationalist resurgence following the breakdown of Soviet power Still the most comprehensive and systematic historical comparison of nationalist politics *Nationalism and the State* is an indispensable book for anyone seeking to understand modern politics *The Colonial Contest for the Nigerian Region, 1884-1900* Olayemi Akinwumi, 2002 This book examines German participation in the colonial contest for Nigeria during the scramble for and partition of Africa at the end of the nineteenth Century It focuses on the activities of some German individuals and organisations that were actively engaged in

the struggle to acquire the Nigerian region as a colony for Germany There are two reasons for this failure one lack of consistent colonial policy during Bismarck's era and two the Opposition of the Royal Niger Company The only success recorded in Nigeria was in Adamawa and Borno Germany got some parts of these emirates as a result of the determination of the Royal Niger Company supported by the British government to deny the French any access to the navigable part of the two major rivers Germany retained control of this region until the outbreak of the First World War

The African Colonial State in Comparative Perspective Crawford Young, 1994-01-01 In this comprehensive and original study a distinguished specialist and scholar of African affairs argues that the current crisis in African development can be traced directly to European colonial rule which left the continent with a singularly difficult legacy that is unique in modern history Crawford Young proposes a new conception of the state weighing the different characteristics of earlier European empires including those of Holland Portugal England and Venice and distilling their common qualities He then presents a concise and wide ranging history of colonization in Africa from the era of construction through consolidation and decolonization Young argues that several qualities combined to make the European colonial experience in Africa distinctive The high number of nations competing for power around the continent and the necessity to achieve effective occupation swiftly yet make the colonies self financing drove colonial powers toward policies of ruthless extractive action The persistent virulent racism that established a distance between rulers and subjects was especially central to African colonial history Young concludes by turning his sights to other regions of the once colonized world comparing the fates of former African colonies to their counterparts elsewhere In tracing both the overarching traits and variations in African colonial states he makes a strong case that colonialism has played a critical role in shaping the fate of this troubled continent

Towards an Understanding of the African Experience from Historical and Contemporary Perspectives Festus Ugboaja Ohaegbulam, 1990 This introductory survey provides a rich understanding of the African experience which until recently either had been omitted from the curriculum of institutions of higher learning or was distorted in written and oral literature The book identifies the post World War II civil rights movement in America and the independence revolution in Africa as the most decisive forces that generated interest in the study of the African black experience Includes four theoretical models for interpreting the black experience The author discusses the place and role of Africa in the development of human civilization focusing on Africa's Nile Valley civilizations and Western Sudanic empires It probes aspects of traditional African culture including the family traditional political institutions and religion and analyzes the impact on Africa and its peoples of such historical traumas as slavery colonialism and decolonization

The World of Marcus Garvey Judith Stein, 1991-01-01 In the years during and after World War I the Pan Africanist Marcus Garvey led what has been called the largest international mass movement of black people in the twentieth century He and his organization the Universal Negro Improvement Association UNIA built a steamship line sponsored expeditions to Liberia staged annual international conventions inspired many black business enterprises endorsed black

political candidates and fostered the study of black history and culture In *The World of Marcus Garvey* Judith Stein examines Garvey's ideology and appeal by placing Garvey and the UNIA carefully in the context of the international black politics and class structure of the period She analyzes the ways Garvey boldly employed conventional racial ideas and goals to organize a militant black population during the social and political upheavals of World War I and its aftermath In addition Stein sheds new light on her subject drawing on personal interviews with surviving Garveyites and reports from the federal government's intelligence organizations

Robert Thorne Coryndon Christopher P. Youé, 2006-01-01 Robert Thorne Coryndon born in South Africa in 1870 served twenty eight years as the top ranking administrator of African dependencies a career unmatched by any other British colonial governor Governors were expected through a combination of good sense and good character to exercise rule over dependent peoples in an honest and impartial manner an amalgam of liberal values and autocratic methods which lent a certain ambiguity to British imperial rule in Africa and elsewhere During his rule in Barotseland 1897-1907 under Cecil Rhodes British South Africa Company Coryndon confronted the problems of establishing a colonial regime in 1914-1915 during the last seven years of his Swaziland appointment he served as Chairman of the land commission that delineated the boundaries of African reserves in Southern Rhodesia as governor of Uganda during a time of rapid economic expansion 1917-1922 he set up legislative and executive councils and as governor of Kenya 1922-1925 he formed local native councils as an experiment in indigenous administration This first full length study of Coryndon is neither a traditional gubernatorial biography of a favoured son of the imperial school nor an ideological history of colonial oppression Instead You sets out to analyze Coryndon's relationships with African rulers white settlers Indian traders and metropolitan officials in order to assess the impact of his administrations on the territories he governed and to delineate the constraints on proconsular rule
