International Security Bilal Karabulut, 2024-04-01 International Security Threats Theories and Transformation maps out security studies the subdiscipline of discipline of International Relations IR which has strong topics and dynamic structure but this and almost everything in the globalization process is changing or transforming rapidly This situation also affects the field of IR and security studies New concepts are entering literature traditional thought patterns are not enough to understand and make sense of the IR discipline In addition to traditional security issues such as terrorism and war new security areas emerging with the process of globalization are also comprehensively analyzed in this book These include energy security cyber security environmental security health security economic security food security demographic security and irregular migration

Security Strategies, Power Disparity and Identity Olav F. Knudsen, 2017-11-30 What is power and how is it effective This volume responds to these questions in terms of regional international relations with a particular focus on the Baltic Sea region an area still charged with a residue of Cold War conflict and power disparity in a setting of new cooperative ventures Each contributor examines the region from a different angle and discusses how its actors coped with the new situation facing them after 1991 The volume looks at how governments have defined their new circumstances how they have dealt with the opportunity to shift to a new mode of coexistence and collaboration and how they have tackled the challenge of peacefully converting their region to a security community The book breaks with tradition by adopting a new thematic approach based on regional issues and functions rather than a country by country discourse It will be of critical value to readers interested in security studies and European politics

Emerging Technologies and International Security Reuben Steff, Joe Burton, Simona R. Soare, 2020-11-25

This book offers a multidisciplinary analysis of emerging technologies and their impact on the new international security environment across three levels of analysis. While recent technological developments such as Artificial Intelligence, AI, robotics, and automation have the potential to transform international relations in positive ways, they also pose challenges to peace and security and raise new ethical, legal, and political questions about the use of power and the role of humans in war and conflict. This book makes a contribution to these debates by considering emerging technologies across three levels of analysis: 1) the international system/systemic level including the balance of power; 2) the state and its role in international affairs and how these technologies are redefining and challenging the state's traditional roles; and 3) the relationship between the state and society including how these technologies affect individuals and non-state actors. This provides specific insights at each of these levels and generates a better understanding of the connections between the international and the local when it comes to technological advance across time and space. The chapters examine the implications of these technologies for the balance of power, examining the strategies of the US, Russia, and China to harness AI, robotics, and automation, and how their militaries and private corporations are responding; how smaller and less powerful states and non-state actors are adjusting the political, ethical, and legal implications of AI and automation; what these technologies mean for how war and power is understood and utilized in the 21st century; and how these technologies diffuse power away from the state to society, individuals, and non-state actors. This volume will be of much interest to students of international security, science, and technology studies, law, philosophy, and international relations.

ECCWS 2018 17th European Conference on Cyber Warfare and Security V2 Audun Jøsang, 2018-06-21

Educating International Security Practitioners: Preparing to Face the Demands of the 21st Century International Security Environment James M. Smith, 2001. The authors examine the challenges of the 21st-century international security environment to which future strategic leaders and policy practitioners will need to respond. More specifically, they offer the reader insights into security studies and leadership development at their respective levels: military undergraduate, civilian undergraduate, traditional and nontraditional graduate, and senior military officer and institutions including research centers and professional outreach programs. The goal is to inform a broader audience about what is currently being done in the way of educating strategic practitioners at these various institutions and what might need to be done differently or better.

The Resurgence of the State Sai Felicia Krishna-Hensel, 2016-12-05

The transnational architecture of global information networks has made territorial borders less significant. Boundaries between spaces are becoming blurred in the evolving information age. But do information and communication technologies networks really lead to a weakening of the nation-state? This volume revisits the retreat of the state thesis and tests its validity in the 21st century. It considers cyberspace as a matter of collective and policy choice, prone to usurpation by governance structures. Governments around the world are already reacting to the information revolution and trying to re-establish their leading role in creating governance regimes for the Information Age. The volume comes at a historical moment when new

political dynamics are detected and new conceptual models are sought to categorize the attempts to deal with global transnational issues It will intrigue the reader with expert level analysis of the role of the state in the emerging global supranational governance structures by providing historical context and conceptualizing trends and social dynamics

The Role of Intelligence and State Policies in International Security Mehmet Emin Erendor, 2021-10-28 It is well known that the understanding of security has changed since the end of the Cold War This in turn has impacted the characteristics of intelligence as states have needed to improve their security policies with new intelligence tactics This volume investigates this new state of play in the international arena
