The Information Society By:

The Information Society William J. Martin, 1988 **The Information Society Reader** with Raimo Blom, Erkki Karvonen, Harri Melin, Kaarle Nordenstreng, Ensio Puoskari, Frank Webster, Professor Frank Webster, 2020-04-02 There has been much debate over the idea of the information society. Some thinkers have argued that information is becoming the key ordering principle in society, whereas others suggest that the rise of information has been overstated. Whatever the case, it cannot be denied that informatization has produced vast changes in advanced societies. The Information Society Reader pulls together the main contributions to this debate from some of the key figures in the field. Major topics addressed include post industrialism, surveillance, transformations, the network society, democracy, digital divisions, virtual relations. With a comprehensive introduction from Frank Webster, selections from Manuel Castells, Anthony Giddens, Michel Foucault, and Christopher Lasch, amongst others, and section introductions contextualising the readings, this book will be an invaluable resource for students and academics studying contemporary society and all things cyber.

The Information Society Armand Mattelart, 2003-04-03 The impact of the information society are multiform and transdisciplinary. There are few areas of social, political, and economic life that have not been affected or challenged by the new technologies of information and communication. In this short introduction, Armand Mattelart unpacks the notion of the information society and examines why it has become the dominant paradigm for social change in the 21st Century. Critically, he also asks why the notion has come to dominate in the absence of any critical examination of the conditions under which it has been produced. Combining a long term historical and geopolitical perspective, Mattelart questions the axioms used to legitimate the Information Society and critically assesses the ways in which it has been conceptualised as a theoretical concept as well as a policy making tool. This introduction will be of interest to all students of media and communication as well as social scientists in general.

Theories of the Information Society Frank Webster, 2002 In the first edition of Theories of the Information Society, Frank Webster set out to make sense of the information explosion, taking a sceptical look at what thinkers mean when they refer to the information society and critically examining all the major post war theories and approaches to informational development.

The Global Information Society William J. Martin, 2017-07-05 Today, information and the technologies that store and disseminate it are producing deep rooted and widespread changes in society, changes of the same magnitude as those that occurred during the Industrial Revolution. The purpose of this book is to give a complete picture of the information society by examining in detail the social, economic, political, and cultural roles of information and information technology. This book is effectively a second edition of the author's classic The Information Society. In it, the author illustrates the major trends in and inter relationships between information, information and communication technologies, and the global economy and society. In tracing the direction of information based change, he reveals the implications for ordinary citizens for the quality of everyday life, for economic and social activity, and examines the prospects of nations and trading blocs. This

book provides a new way of looking at society one that is essential for understanding social and economic structures and processes in the information age

The Information Society Herbert S. Dordick,Georgette Wang,1993-06-16 The past three decades have witnessed the worldwide growth of an information industry and the definition of the new information sector With modern telecommunications and information technology the industrialized nations are creating a system in which information goods and services can be bought and sold as in a goods market place This book defines informatization in three ways infrastructure economic and social The analysis focuses on 19 countries which are categorized as high middle and low income nations by Gross Domestic Product per capita The countries include Australia Brazil Canada China France Germany Hong Kong India Japan Mexico the Netherlands New Zealand Singapore South Korea Taiwan UK and USA

The Information Society Robert Hassan,2013-04-25 What are we to make of the information society Many prominent theorists have argued it to be the most profound and comprehensive transformation of economy culture and politics since the rise of the industrial way of life in the 18th century Some saw its arrival in a positive light where the dreams of democracy of connectivity and efficiency constituted a break with the old ways But other thinkers viewed it more in terms of the recurrent nightmare of capitalism where the processes of exploitation commodification and alienation are given much freer rein than ever before In this book Robert Hassan a prominent theorist in new media and its effects analyses and critically appraises these positions and forms them into a coherent narrative to illuminate the phenomenon Surveying the works of major information society theorists from Daniel Bell to Nicholas Negroponte and from Vincent Mosco to Manuel Castells The Information Society is an invaluable resource for understanding the nature of the information society as well as the meta processes of neoliberal globalisation and the revolution in information technologies that made it possible

The Information Society John Feather,1998 What is information Who are the information rich and who are the information poor In this updated book the information society is explored in the light of the economic and social pressures which are placed upon information gatherers and keepers The commercial value of information to those who wish to access it and to those who wish to process and disseminate it becomes increasingly important in a world where information can be transmitted in split seconds

The Information Society: Evolving Landscapes Jacques Berleur, Andrew Clement, Richard Sizer, Diane Whitehouse, 2013-11-11 UR Reader consists of a set of essays written by international authors many 0 of whom are acknowledged experts in one or more aspects of information technology IT and its implications for society The contents have been influenced by the fact that the relationship between IT and society has to be considered in an holistic context Our purpose has been to present this series of essays in the loosely related perspectives of landscapes which reflect that holism As editors we have chosen to leave people free to select the different perspectives and traverse the landscapes in any manner they choose The Reader seeks to raise social awareness of the issues at stake when we talk 1 about computers and social accountability and aims to encourage wider discussion of the issues involved It has a normative set of aims and indicates a determination to explore a possible reshaping and restructuring of information technology according to human needs In an Epilogue new pointers are given for action In what follows we describe the rationale behind The Information Society Evolving Landscapes we move from the conference held at the University of Namur in June 1988 which shaped the perspectives then on to the various routes by which the landscapes can be traversed

Living the Information Society in Asia Erwin Alampay, 2009-04-14 Undeniably Asian societies are in a period of transition when people are learning to live with new information and communication technologies ICTs whether in commerce government or development work Living the Information Society in Asia describes the interaction of people and new ICTs as the technologies seep into everyday life such as how mobile phones forge relationships among families separated by migration how camera phones threaten personal space how cultural identities are strengthened in call centres and how religion is incorporated into the new communication technologies people use Living the Information society in Asia looks at the phenomenon as it unfolds and raises the implications for policy and future research

Information Society Studies Alistair S. Duff, 2013-12-02 We are often told that we are living in an information society or that we are information workers But what exactly do these claims mean and how might they be verified In this important methodological study Alistair S Duff cuts through the rhetoric to get to the bottom of

the information society thesis Wide ranging in coverage this study will be of interest to scholars in information science communication and media studies and social theory It is a key text for the newly unified specialism of information society studies and an indispensable guide to the future of this discipline

The Future of Identity in the Information Society Vashek Matyáš, Simone Fischer-Hübner, Daniel Cvrcek, Petr Švenda, 2009-07-26 What constitutes an identity how do new technologies affect identity how do we manage identities in a globally networked information society The increasing diversity of information and communication technologies and their equally wide range of usage in personal professional and official capacities raise challenging questions of identity in a variety of contexts The aim of the IFIP FIDIS Summer Schools has been to encourage young academic and industry entrants to share their own ideas about privacy and identity management and to build up collegial relationships with others As such the Summer Schools have been introducing participants to the social implications of information technology through the process of informed discussion The 4th International Summer School took place in Brno Czech Republic during September 1-7 2008 It was organized by IFIP International Federation for Information Processing working groups 9.2 Social Accountability 9.6 11.7 IT Misuse and the Law and 11.6 Identity Management in cooperation with the EU FP6 Network of Excellence FIDIS and Masaryk University in Brno The focus of the event was on security and privacy issues in the Internet environment and aspects of identity management in relation to current and future technologies in a variety of contexts
