International Money and Credit Mr. George M. Von Furstenberg, 1984-09-15 Edited by George M von Furstenberg this volume presents the rethinking of the functions and purposes served by international monetary arrangements at leading universities banks and official institutions *Deglobalization, Financial Inequality, and the Green Economy* Fikret Čaušević, 2023-10-20 One of the most challenging issues for the current state of global economy is a highly uneven distribution of global financial assets and liabilities Drawing on extensive data this book analyses the new global divisions in economic and financial inequality across the globe in the first two decades of this century After outlining the context of the global financial system in the aftermath of the Global Financial Crisis of 2008 2009 this book provides a detailed examination of the data on economic and financial inequality analysing growth rates relative to financial liabilities and assets for all countries where data is available The central issues in understanding the financial and environmental efficiency of economic growth are also addressed as well as the development of financial and regulatory technologies FinTech and RegTech The final part of this book explores the changes in economic growth and financial assets liabilities as a result of major events in the past three years Covid Crisis the rise of inflation and the Russian invasion of Ukraine The focal point of this analysis is the relationship between the speed of economic growth the use of financial resources for funding that growth and levels of inequality The green transition as one of the most important challenges in the global economy is an integral part of this analysis along with the inequality in available financial resources for this transition and potential threats to global financial stability This book will be vital reading for those interested in inequality financial economics the global financial system and economic growth The George Washington journal of international law and econo, 1982 **Encyclopedia of Legal Information Sources** Paul Wasserman, Gary McCann, Patricia Tobin, 1988 **Subject Guide to Books in Print**, 1996

Journal of Economic Literature ,1983 *From Asian to Global Financial Crisis* Andrew Sheng,2009-09-28 This is a unique insider account of the new world of unfettered finance The author an Asian regulator examines how old mindsets market fundamentalism loose monetary policy carry trade lax supervision greed cronyism and financial engineering caused both the Asian crisis of the late 1990s and the current global crisis of 2008 2009 This book shows how the Japanese zero interest rate policy to fight deflation helped create the carry trade that generated bubbles in Asia whose effects brought Asian economies down The study s main purpose is to demonstrate that global finance is so interlinked and interactive that our current tools and institutional structure to deal with critical episodes are completely outdated The book explains how current financial policies and regulation failed to deal with a global bubble and makes recommendations on what must change

Productivity and Prices Steven Lustgarten,1984 Study of trends in industrial concentration and their implications for prices and productivity in the USA manufacturing industry 1947 to 1972 shows that higher productivity growth and smaller price increases occurred where concentration increased most claims that industrial policy should not hinder formation of quasimonopolys Graphs references and tables

Paperbound Books in Print ,1991 Crisis Economics Nouriel Roubini, Stephen Mihm, 2010-05-11 This myth shattering book reveals the methods Nouriel Roubini used to foretell the current crisis before other economists saw it coming and shows how those methods can help us make sense of the present and prepare for the future Renowned economist Nouriel Roubini electrified his profession and the larger financial community by predicting the current crisis well in advance of anyone else Unlike most in his profession who treat economic disasters as freakish once in a lifetime events without clear cause Roubini after decades of careful research around the world realized that they were both probable and predictable Armed with an unconventional blend of historical analysis and global economics Roubini has forced politicians policy makers investors and market watchers to face a long neglected truth financial systems are inherently fragile and prone to collapse Drawing on the parallels from many countries and centuries Nouriel Roubini and Stephen Mihm a professor of economic history and a New York Times Magazine writer show that financial cataclysms are as old and as ubiquitous as capitalism itself The last two decades alone have witnessed comparable crises in countries as diverse as Mexico Thailand Brazil Pakistan and Argentina All of these crises not to mention the more sweeping cataclysms such as the Great Depression have much in common with the current downturn Bringing lessons of earlier episodes to bear on our present predicament Roubini and Mihm show how we can recognize and grapple with the inherent instability of the global financial system understand its pressure points learn from previous episodes of irrational exuberance pinpoint the course of global contagion and plan for our immediate future Perhaps most important the authors considering theories statistics and mathematical models with the skepticism that recent history warrants explain how the world s economy can get out of the mess we re in and stay out In

Roubini's shadow economists and investors are increasingly realizing that they can no longer afford to consider crises the black swans of financial history. A vital and timeless book, *Crisis Economics*, proves calamities to be not only predictable but also preventable and with the right medicine curable.
