So, You Wish to Learn All about Economics? Lyndon H. LaRouche, 1995 **So, You Wish to Learn All about Economics?** Lyndon LaRouche, Down with Adam Smith Away with the foolish professors who claim economics is the dismal science chained to a calculus of scarce resources The only economics worth knowing is the science of increasing mankind's power over nature at increasing rates in accordance with natural law as expressed in the Book of Genesis LaRouche puts economics back where it belongs so that every citizen can master for himself the fundamental principles that made the United States an industrial and agricultural superpower from the advanced standpoint required to run a 21st century fusion power economy The present Second Great Depression is completely unnecessary There is no need for the 1931 style financial collapse that faces the Trans Atlantic region today The rapidly developing nations of the world are using the ideas in this book to create spread and share a prosperous future Should the United States decide to join them in applying the ideas in this book the future of civilization will be of unlimited potential

The University Becoming Søren S. E. Bengtson, Sarah Robinson, Wesley Shumar, 2021-06-23 This volume wholeheartedly engages with the current climate in higher education and provides not only a thorough analysis of the foundational elements constituting higher education but also a critical discussion of possible connections to societal and cultural domains and policy debates Today higher education institutions and programs are beset with multiple and often conflicting pressures and demands Higher education is regarded by societies in general and at the political level in particular as a pathway to securing continued economic growth and ensuring cultural growth in surrounding societal contexts Future academics are expected to become experts within their disciplines and at the same time to acquire and develop generic competences and transferable skills directly translatable into

job market and professional contexts These conflicting and fragmented policy approaches to higher education leaves academic leaders teacher researchers and students with an incoherent curriculum and a confused and eroded academic identity and societal outlook Much literature within higher education research that engages with similar topics are dominated by a backwards looking and heavy critique of current political and educational conditions for the university and higher education This volume suggests a new tack that is defined by openness and optimism towards possibilities for a transformative higher education curriculum that at the same time stays firmly rooted within the foundational academic soil By drawing on and contributing to the emerging research field the philosophy and theory of higher education the book combines critique with a constructive and future oriented approach and outlook on higher education Further it combines and links philosophical discussions on the idea of the future university with societal responsibility and a curricular and formational awareness

Institution-formation theory and principles of its construction. Globalization and the main mechanisms of the development of society A. Safonov,A. Orlov,2021-06-09 This monograph focuses on the study of the laws that govern the development of globalization and the establishment of the new age of post globalization as well as the analysis of the reasons for the emergence of the crisis in the humanities The result of research presented principles of building a new socio philosophical theory which will help forecast with a high degree of probability the development of the society and explain the processes that happen inside it
