

Computer Vision and Legal, social, ethical and professional (LSEP) Issues and Challenges

Abstract— The field of computer vision has seen rapid advancements in recent years, with applications ranging from image recognition and object detection to autonomous vehicles and medical diagnostics. However, along with technological progress, there is a growing recognition of the legal, social, ethical, and professional (LSEP) issues and challenges associated with the deployment of computer vision systems. This paper provides an overview of the key LSEP considerations in the development and implementation of computer vision technologies. It explores legal issues related to privacy, data protection, intellectual property, and liability. Additionally, it discusses social implications such as biases in datasets and algorithmic decision-making, as well as ethical dilemmas surrounding surveillance, consent, and fairness. Furthermore, it addresses professional responsibilities, including transparency, accountability, and the ethical use of AI technologies. By examining these LSEP issues and challenges, this paper aims to foster a deeper understanding of the complex interplay between technology and society and to inform the development of responsible and sustainable computer vision solutions.

Introduction

Computer Vision is a field of artificial intelligence and computer science that focuses on enabling computers to interpret and understand visual information from the real world. It aims to replicate the human visual system by enabling machines to extract useful insights from images or videos. This

field encompasses various tasks such as image recognition, object detection, image segmentation, facial recognition, and scene understanding. The advancements in Computer Vision have been driven by developments in machine learning, deep learning, and the availability of large-scale datasets. These technologies allow computers to learn complex patterns and features from visual data, enabling them to perform tasks that were once considered exclusive to human vision. Applications of Computer Vision span across multiple industries and domains, including healthcare (medical image analysis), automotive (autonomous vehicles), retail (visual search and recommendation systems), security and surveillance, agriculture, manufacturing, and entertainment (augmented reality and virtual reality). However, along with its rapid development and widespread adoption, Computer Vision also brings forth various challenges and considerations, particularly in the realm of legal, social, ethical, and professional aspects.

Ethical and Societal Issues caused by the misuse of computer vision

Security Concerns: Facial recognition can be fooled by hackers and criminals using masks or photos, allowing them to steal identities for fraudulent purposes. A Wall Street Journal report documented over 80,000 such attempts to exploit unemployment benefits during the pandemic.

Bias Concerns: Facial recognition can be biased against certain demographics. Studies show higher error rates in identifying Black and Asian faces, leading to potential wrongful arrests. It's also less

Social And Ethical Effects Of The Computer Revolution:

Social and Ethical Effects of the Computer Revolution Joseph Migga Kizza, 1996 Written by many of the leading experts in the new field of computer ethics these articles examine the key issues The work is divided into six sections Introduction Education Ethics Technology and Value Software Reliability and Computer Security The Professions and Workplace Issues and Artificial Intelligence and Cyberspace Designed as both a textbook and a lay guide the book provides a good understanding of the relationship between ethics and information technology

Ethical and Social Issues in the Information Age Joseph Migga Kizza, 2010-03-14 The frequency of new editions of this book is indicative of the rapid and tremendous changes in the fields of computer and information sciences First published in 1995 the book has rapidly gone through three editions already and now we are in the fourth Over this period we have become more dependent on computer and telecommunication technology than ever before and computer technology has become ubiquitous Since I started writing on social computing I have been predicting a time when we as individuals and as nations will become totally dependent on computing technology That time is almost on us Evidence of this is embodied in the rapid convergence of telecommunication broadcasting and computing devices the miniaturization of these devices and the ever increasing storage capacity speed of computation and ease of use These qualities have been a big pulling force sucking in millions of new users every day sometimes even those unwilling Other appealing features of these devices are the increasing number of applications apps as they are increasingly becoming known and being wireless and easily portable Whether small or big these new gizmos have become the centerpiece of an individual's social and economic activities and the main access point for all information Individuals aside computing technology has also become the engine that drives the nation's strategic and security infrastructures that control power grids gas and oil storage facilities transportation and all forms of national communication including emergency services

Ethical and Social Issues in the Information Age Joseph M. Kizza, 2007-06-02 Since the publication of the first edition in 1997 there have been tremendous changes in the fields of computer science and information sciences During this period we have become more dependent than ever before on computer and telecommunication technology As we both individually and as nations become more dependent on cyberspace technology it has itself become a critical component of individual nation's security infrastructures that control power grids gas and oil storage facilities transportation and all forms of national communication including emergency services The recent rise in cyber attacks many of them with lightning speed affecting millions of computers worldwide and causing billions of dollars in losses both to individuals and businesses is an indication of how unprepared we are to handle such attacks not only today but also in the future Such attacks are a mark of the poor state of our cyberspace security policies The facts that there are no signs to indicate there is going to be a slowdown in such attacks and that nations are not doing anything worth calling preventive has heightened the need for an effective strategy to produce responsible professionals who can play an active role in the fight

against computer and cyber tacks and vandalism An Ethical Global Information Society Jacques J. Berleur, Diane Whitehouse, 2013-11-11 Many challenges lie ahead in the development of a global information society Culture and democracy are two areas which may be under particular threat The book reflects on today s complex and uncertain cultural and democratic developments arising as a result of an increasingly global technologically connected world In particular it focuses on the Internet examining new metaphors for communication defining the issues at stake and proposing options actions and solutions Among the issues discussed were multi cultural developments cultural sensitivities and the involvement of cultural minorities generation gaps gender issues technology access for the elderly and the disabled technology transfer

Recordkeeping, Ethics and Law Livia Iacovino, 2006-07-20 Distributed networks such as the Internet have altered the fundamental way a record is created captured accessed and managed over time and therefore who controls has access to and is responsible for its authenticity Law and ethics provide the major sources of regulatory controls over participants in such networks This book analyses the interrelationship of recordkeeping ethics and law in terms of existing regulatory models and their application to the Internet environment It proposes the legal and social relationship model as an analytical tool for identifying the rights and obligations of recordkeeping participants in networked business transactions within communities of common interest based on trust The model is also used to examine the legal concepts of property access privacy and evidence with particular reference to its Internet context As legal relationships have their basis in the law of obligations found in both common and civil law systems as well as archival science the model has a broad based application The approach in this book has been to reconcile a number of archival traditions the common strands rather than the differences in particular concepts of identity trust acts actors and social relationships as fundamental concepts to social regulation It is therefore primarily directed to archives and records academics and practitioners especially those working within the realm of electronic records in order to provide them with a sound theoretical and practical knowledge of the legal and ethical dimensions of records created in distributed environments **Ethical and Secure Computing** Joseph Migga
