role of disaffection Contrasting Dynamics in Education Politics of Extremes ,2015-01-01 This book aims to enhance understanding of school choice as a supra national travelling policy explored in two strikingly different societies Latin American Chile and North European Finland Chile was among the first countries to implement school choice as a policy which it did comprehensively in the early 1980s through the creation of a market environment Finland introduced parental choice of a school on a very moderate scale and without the market elements in the mid 1990s Predominant aspects of Chilean basic schooling include provision by for profit and non profit private and municipal organisations voucher system parental co payment and ranking lists Finland persists in keeping education under public authority governance and free of charge and in prohibiting profit making and rankings The wide range of sociologists of education contributing to this book offer novel analyses and perspectives on the operation of school choice in Chile the trailblazer and Finland the European PISA leader Agn s van Zanten s description of how school choice operates as a major dimension of social reproduction sets the scene After that Chilean and Finnish authors explore how the policy is displayed and used explicitly for very different societal purposes although implicitly following similar patterns in the two countries with their histories politics and cultures Empirically the focus is on how families view and act on school choice The research material includes large surveys interviews and ethnographic data gathered in urban Chile and Finland Capitalising on the concept of dynamics the book concludes with some insights into how this globally travelling education policy has materialised in two apparently dissimilar societies and their localities **AQA Sociology for A-level Book 1** David Bown,Laura Pountney,Tomislav Maric,2015-10-16 Exam Board AQA Level AS A level Subject Sociology First Teaching September 2015 First Exam June 2016 Build students understanding with this concept driven approach to the 2015 AQA A level Sociology specification written by a team of leading subject authors and approved by AQA Develop the knowledge required to master Year 1 topics with clear and accessible content coverage Build confidence in the evaluative skills needed to assess sociological theories and research Strengthen learning and revision with a wealth of practice and extension questions and activities Social Class, Gender and Exclusion from School Jean Kane,2013-10-14 Rising exclusion rates indicate the continuing marginalisation of many young people in education in the UK Working class boys children living in poverty and children with additional special educational needs are among those experiencing a disproportionate rate of exclusion This book traces the processes of exclusion and alienation from school and relates this to a changing social and economic context Jean Kane argues that policy on schooling including curricular reform needs to be re connected to the broad political pursuit of social justice and presents compelling case studies of excluded pupils showing the multi faceted identities of pupils with a particular focus on masculine and feminine identities This invaluable contribution to the literature offers an alternative analysis where the social identities of pupils are shown to be tied up with their exclusion from school Themes investigated include the meanings of school exclusions social class gender and schooling social identities of excluded pupils negotiating identities in school moving

towards exclusion exclusions and young people s lives improving participation in schooling Providing fascinating reading for teachers social workers researchers and policy makers this book considers how educational disadvantage might be addressed through recognition of the gender and class identities of pupils

Middle-class School Choice in Urban Spaces Emma Rowe,2016-12-01 Middle class School Choice in Urban Spaces examines government funded public schools from a range of perspectives and scholarship in order to examine the historical political and economic conditions of public schooling within a globalized post welfare context In this book Rowe argues that post welfare policy conditions are detrimental to government funded public schools as they engender consistent pressure in rearticulating the public school in alignment with the market produce tensions in serving the more historical conceptualizations of public schooling and are preoccupied by contemporary profit driven concerns Chapters focus on public schooling from different global perspectives with examples from Chile and the US to examine how various social movements encapsulate ideologies around public schooling Rowe also draws upon a rich five year ethnographic study of campaigns lobbying the Victorian State Government in Australia for a brand new local specific public school Critical attention is paid to the public school as a means to achieve empowerment and overcome discrimination and both a local and global lens are used to identify how parents choose the public school the values they attach to it and the strategies they use to obtain it Also considered however are how quality gaps distances and differences between public schools threaten to undermine the democracy of education as a means for individuals to be socially mobile and escape poverty This book makes an important contribution to our understanding of global social movements and activism around public education As such it will be of key interest to researchers academics and postgraduate students in the field of education specifically those working on school choice class and identity as well as
