This book is an original systematic and radical attempt at decolonizing critical theory Drawing on linguistic concepts from 16 languages from Asia Africa the Arab world and South America the essays in the volume explore the entailments of words while discussing their conceptual implications for the humanities and the social sciences everywhere The essays engage in the work of thinking through words to generate a conceptual vocabulary that will allow for a global conversation on social theory which will be necessarily multilingual With essays by scholars across generations and from a variety of disciplines history anthropology and philosophy to literature and political theory this book will be essential reading for scholars researchers and students of critical theory and the social sciences      **Medicine and Society in Wakefield and Huddersfield 1780-1870** Hilary Marland,1987-09-24 This ambitious book presents an across the board study of medicine in any urban centre for any period of British history By selecting Wakefield and Huddersfield as contrasting types of northern towns and examining in details their systems of medical care Dr Marland has written a local history that says something important about the country as a whole Wakefield and Huddersfield contrasted in their economic demographic and social development during the late eighteenth and early nineteenth centuries allowing an effective comparative analysis of medical facilities in the two communities By drawing on diverse sources from Poor Law and philanthropy to self help organisations fringe medicine and medical practice the book places the development of medical services against the backdrop of the communities in which they evolved their class structure organization and social civic and economic developments      **Cities and Economy in Europe** Katalin Szende,Erika Szívós,Boglárka Weisz,2024-02-29 Exploring new perspectives concerning regions traditionally considered on the margins of Europe this book fills a gap in current historiography through its analysis of cities space and economy from the High Middle Ages to the present Markets trade and economy in general have formed the backbone of urban life ever since the emergence of cities and towns but classical theorists have largely focused on developments in Western Europe Urban research in the last few decades has advanced in many ways to supersede and correct this still influential image and to include other parts of Europe into the analytical framework Building on these emerging methodologies this volume pays close attention to the fringes of Europe in the East North West and South The essays discuss the development of various spaces as nodal points for the exchange and production of commodities that took place in cities and towns The scope of this work allows for a point of comparison to frequently studied examples in Europe encouraging readers to identify larger patterns beyond individual examples Cities and Economy in Europe Markets and Trade on the Margins from the Middle Ages to the Present is the perfect resource for students and researchers of economic and urban history      The Prospect of Industry 5.0 in Biomanufacturing Pau Loke Show,Kit Wayne Chew,Tau Chuan
