Making Strategies in Spatial Planning Maria Cerreta,Grazia Concilio,Valeria Monno,2010-09-11 This provocative collection of essays challenges traditional ideas of strategic s tial planning and opens up new avenues of analysis and research The diversity of contributions here suggests that we need to rethink spatial planning in several f reaching ways Let me suggest several avenues of such rethinking that can have both theoretical and practical consequences First we need to overcome simplistic bifurcations or dichotomies of assessing outcomes and processes separately from one another To lapse

into the nostalgia of imagining that outcome analysis can exhaust strategic planners work might appeal to academics content to study what should be but it will doom itself to further irrelevance ignorance of politics and rationalistic technocratic fantasies But to lapse into an optimism that good process is all that strategic planning requires similarly rests upon a cition that no credible planning analyst believes that enough talk will miraculously transcend con ict and produce agreement Neither sing minded approach can work for both avoid dealing with con ict and power and both too easily avoid dealing with the messiness and the practicalities of negotiating out con icting interests and values and doing so in ethically and politically critical ways far from resting content with mere compromise Second we must rethink the sanctity of expertise By considering analyses of planning outcomes as inseparable from planning processes these accounts help us to see expertise and substantive analysis as being on tap ready to put into use rather than being particularly and technocratically on top

precarious employment histories Millions of workers today labor in nontraditional situations involving part time work temporary agency employment and skills underutilization or face the precariousness of long term unemployment To date research has largely focused on how these experiences shape workers well being rather than how hiring agents perceive and treat job applicants who have moved through these positions Shifting the focus from workers to hiring agents Making the Cut explores how key gatekeepers HR managers recruiters and talent acquisition specialists evaluate workers with nonstandard mismatched or precarious employment experience Factoring in the social groups to which workers belong such as their race and gender David Pedulla shows how workers get jobs how the hiring process unfolds who makes the cut and who does not Drawing on a field experiment examining hiring decisions in four occupational groups and in depth interviews with hiring agents in the United States Pedulla documents and unpacks three important discoveries Hiring professionals extract distinct meanings from different types of employment experiences the effects of nonstandard mismatched and precarious employment histories for workers job outcomes are not all the same and the race and gender of workers intersect with their employment histories to shape which workers get called back for jobs Indeed hiring professionals use group based stereotypes to weave divergent narratives or stratified stories about workers with similar employment experiences The result is a complex set of inequalities in the labor market Looking at bias and discrimination social exclusion in the workplace and the changing nature of work Making the Cut probes the hiring process and offers a clearer picture of the underpinnings of getting a job in the new economy
