Globalization, Environmental Change, and Social History Peter Boomgaard, Marjolein 't Hart, 2011-02-24 Throughout all ages the activities of mankind have weighed heavily upon the environment In turn changes in that environment have favoured the rise of certain social groups and limited the actions of others Despite this environmental history has remained a blind spot for most social and economic historians This is to be regretted as the various and unequal effects of environmental change often explain the strengths and weaknesses of certain social groups irrespective of their being defined along the lines of class gender and ethnicity This volume brings together the expertise of social and environmental historians in an effort to assess the extent to which transnational agents changed socioecological space as a consequence of globalization since the Late Middle Ages

Environmental Infrastructure in African History Emmanuel Kreike, 2013-05-13 Environmental Infrastructure in African History offers a new approach for analyzing and narrating environmental change Environmental change conventionally is understood as occurring in a linear fashion moving from a state of more nature to a state of less nature and more culture In this model non Western and premodern societies live off natural resources whereas more modern societies rely on artifact or nature that is transformed and domesticated through science and technology into culture In contrast Emmanuel Kreike argues that both non Western and premodern societies inhabit a dynamic middle ground between nature and culture He asserts that humans in collaboration with plants animals and other animate and inanimate forces create environmental infrastructure that constantly is remade and reimagined in the face of ongoing processes of change

A Companion to Global Environmental History J. R. McNeill, Erin Stewart Mauldin, 2015-05-04 The Companion to Global Environmental History offers multiple points of entry into the history and historiography of this dynamic and fast growing field to provide an essential road map to past developments current controversies and future developments for specialists and newcomers alike Combines temporal geographic thematic and contextual approaches from prehistory to the present day Explores environmental thought and action around the world to give readers a cultural intellectual and political context for engagement with the environment in modern times Brings together environmental historians from around the world including scholars from South Africa Brazil Germany and China

African Environmental Crisis Gufu Oba, 2020-03-13 This book explores how and why the idea of the African environmental crisis developed and persisted through colonial and post colonial periods and why it has been so influential in development discourse From the beginnings of imperial administration the idea of the desiccation of African

environments grew in popularity but this crisis discourse was dominated by the imposition of imperial scientific knowledge neglecting indigenous knowledge and experience African Environmental Crisis provides a synthesis of more than one and a half century s research on peasant agriculture and pastoral rangeland development in terms of soil erosion control animal husbandry grazing schemes large scale agricultural schemes social and administrative science research and vector disease and pest controls Drawing on comparative socio ecological perspectives of African peoples across the East African colonies and post independent states this book refutes the hypothesis that African peoples were responsible for environmental degradation Instead Gufu Oba argues that flawed imperial assumptions and short term research projects generated an inaccurate view of the environment in Africa This book s discussion of the history of science for development provides researchers across environmental studies agronomy African history and development studies with a lens through which to understand the underlying assumptions behind development projects in Africa The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Environment and Identity Politics in Colonial Africa Emmanuel Mbah,2016-12-08 Economic political and ethnic favoritism are common themes in the historiography of colonial Africa Land ownership and control and the abilities of the respective landscapes to sustain Africa s growing population have created recurrent identity crises throughout Africa The chapters discuss the recurrent environmental issues the problems of contested ownership of land autochthonism as well as the blending of different cultures in a restricted area Also highlighted is a neglected aspect of the history of Fulani migrations in West Africa the colonial extension of the Fulani into the Southern Cameroons

Rethinking South Africa's Past Christopher J. Lee, Andrew Offenburger, 2025-03-18 This book presents key historical scholarship published in *Safundi* from 1999 to 2024 tracing South Africa's past through approaches of comparative history transnational history and visual history in addition to addressing the importance of topics like gender labor and class dynamics as well as regional historiographies The first section of the book focuses on comparative history as a founding method for *Safundi* given the journal's origins in American and South African studies while also recalibrating this approach through a variety of topics cities biographies and practices of violence rather than nation states writ large Drawing upon innovative sources of evidence the second section moves beyond the comparative method to address transnational histories as a new narrative technique for storytelling and analysis Whether issues of education immigration or visiting musicians to South Africa these chapters demonstrate the importance of a post national approach for understanding the past The sections that follow fan out into other subject areas including the uses of visual history gender roles class cultures and environmental history all of which illuminate connections between South African history and other parts of the world This book will be an indispensable resource for scholars students activists and policymakers as well as those readers who are

generally interested in understanding South Africa's complex history over the past several centuries Sub-Saharan Africa

Gregory H. Maddox, 2006-03-24 A wealth of information and analysis on the environmental forces that have helped shaped the cultures of the African continent A scholarly reference work that will also appeal to the general reader Sub Saharan Africa sets the story of the African environment within the context of geological time and shows how the continent's often harsh conditions prompted humans to develop unique skills in agriculture animal husbandry and environmental management Part of ABC CLIO's Nature and Human Societies series this book enables readers to better grasp the extent of humanity's effect on our world Of particular interest are the book's sections dealing with the impact of the Biafran famine of the 1960s the Sahelian drought of the 1970s population growth and the ongoing challenges of war and HIV AIDS Crucially the book also shows how despite their relative poverty many African states have coped admirably with rapid urbanization and have developed world class conservation and sustainability programs in order to protect and harness some of the most endangered species in the world *Environment and Empire* William Beinart, Lotte Hughes, 2007-10-11 European imperialism was extraordinarily far reaching a key global historical process of the last 500 years It locked disparate human societies together over a wider area than any previous imperial expansion it underpinned the repopulation of the Americas and Australasia it was the precursor of globalization as we now understand it Imperialism was inseparable from the history of global environmental change Metropolitan countries sought raw materials of all kinds from timber and furs to rubber and oil They established sugar plantations that transformed island ecologies Settlers introduced new methods of farming and displaced indigenous peoples Colonial cities many of which became great conurbations fundamentally changed relationships between people and nature Consumer cultures the internal combustion engine and pollution are now ubiquitous Environmental history deals with the reciprocal interaction between people and other elements in the natural world and this book illustrates the diverse environmental themes in the history of empire Initially concentrating on the material factors that shaped empire and environmental change *Environment and Empire* discusses the way in which British consumers and manufacturers sucked in resources that were gathered hunted fished mined and farmed Yet it is also clear that British settler and colonial states sought to regulate the use of natural resources as well as commodify them Conservation aimed to preserve resources by exclusion as in wildlife parks and forests and to guarantee efficient use of soil and water Exploring these linked themes of exploitation and conservation this study concludes with a focus on political reassertions by colonised peoples over natural resources In a post imperial age they have found a new voice reformulating ideas about nature landscape and heritage and challenging at a local and global level views of who has the right to regulate nature *What is Environmental History?* J. Donald Hughes, 2016-01-11 What is environmental history It is a kind of history that seeks understanding of human beings as they have lived worked and thought in relationship to the rest of nature through the changes brought by time In this new edition of his seminal student textbook J Donald Hughes provides a masterful overview of the thinkers topics and

perspectives that have come to constitute the exciting discipline that is environmental history He does so on a global scale drawing together disparate trends from a rich variety of countries into a unified whole illuminating trends and key themes in the process Those already familiar with the discipline will find themselves invited to think about the subject in a new way This new edition has been updated to reflect recent developments trends and new work in environmental history as well as a brand new note on its possible future Students and scholars new to environmental history will find the book both an indispensable guide and a rich source of inspiration for future work

Landscape, Environment and Technology in Colonial and Postcolonial Africa Toyin Falola, Emily Brownell, 2013-03-01 This volume seeks to identify and examine two categories of colonial and postcolonial knowledge production about Africa These two broad categories are environment and landscape and both are useful and problematic to explore Discussions about African environments often concentrate on Africans as perpetrators of their own land causing degradation from lack of knowledge and technology Landscape defines the category of knowledge produced by foreigners about Africa where Africans remain part of the scenery and yield no agency over their surroundings To flesh out these categories and explore their creation and how they have been deployed to shape colonial and postcolonial discourses on Africa this volume investigates the technological pastoral the points of convergence and conflict between Western notions of pastoral Africa and the introduction of colonial technology scientific ideas and commodification of land and animals

Violent Environments Nancy Lee Peluso, Michael Watts, 2001 Do environmental problems and processes produce violence Current U S policy about environmental conflict and scholarly work on environmental security assume direct causal links between population growth resource scarcity and violence This belief a staple of governmental decision making during both Clinton administrations and widely held in the environmental security field depends on particular assumptions about the nature of the state the role of population growth and the causes of environmental degradation The conventional understanding of environmental security and its assumptions about the relation between violence and the environment are challenged and refuted in Violent Environments Chapters by geographers historians anthropologists and sociologists include accounts of ethnic war in Indonesia petro violence in Nigeria and Ecuador wildlife conservation in Tanzania and friendly fire at Russia's nuclear weapons sites Violent Environments portrays violence as a site specific phenomenon rooted in local histories and societies yet connected to larger processes of material transformation and power relations The authors argue that specific resource environments including tropical forests and oil reserves and environmental processes such as deforestation conservation or resource abundance are constituted by and in part constitute the political economy of access to and control over resources Violent Environments demands new approaches to an international set of complex problems powerfully arguing for deeper more ethnographically informed analyses of the circumstances and processes that cause violence

African Local Knowledge & Livestock Health William Beinart, Karen Brown, 2013 A much needed examination of contemporary approaches to animal healing in South Africa informed by a strong

understanding of history A Companion to World History Douglas Northrop, 2014-12-15 A COMPANION TO WORLD HISTORY This new volume offers insightful reflections by both leading and emerging world historians on approaches methodologies arguments and pedagogies of a sub discipline that has continued to be in flux as well as in need of defining itself as a relevant alternative to the traditional national regional or chronological fields of inquiry Choice The focus on the practicalities of how to do world history probably gives it its edge Its thirty three chapters are grouped into sections that address how to set up research projects in world history how to teach it how to get jobs in it how to frame it and how it is done in various parts of the globe It is an actual handbook in other words as opposed to a sample of exemplary work English Historical Review A Companion to World History offers a comprehensive overview of the variety of approaches and practices utilized in the field of world and global history This state of the art collection of more than 30 insightful essays including contributions from an international cast of leading world historians and emerging scholars in the field identifies continuing areas of contention disagreement and divergence while pointing out fruitful directions for further discussion and research Themes and topics explored include the lineages and trajectories of world history key ideas and methods employed by world historians the teaching of world history and how it draws upon and challenges traditional approaches and global approaches to writing world history By considering these interwoven issues of scholarship and pedagogy from a transnational interregional and world global scale fresh insights are gained and new challenges posed With its rich compendium of diverse viewpoints A Companion to World History is an essential resource for the study of the world s past **The Oxford Handbook of Environmental History** Andrew C. Isenberg, 2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field *Humans and the Environment* Matthew I. J. Davies, M. I. J. Davies, Freda Nkire M'Mbogori, 2013-06-27 This volume resituates the way in which archaeologists use and apply the concept of the environment Covering basic themes such as applied environmental archaeology and the archaeology of disaster each chapter critically explores the potential for archaeological data and practice to contribute to modern environmental issues Triumph of the Expert Joseph Morgan Hodge, 2007-02-15 The most striking feature of British colonialism in the twentieth century was the confidence it expressed in the use of science and expertise especially when joined with the new bureaucratic capacities of the state to develop natural and human resources of the empire Triumph of the Expert is a history of British colonial doctrine and its contribution to the emergence of rural development and environmental policies in the late colonial and postcolonial period Joseph Morgan Hodge examines the way that development as a framework of ideas and institutional practices emerged out of the strategic engagement between science and the state at the climax of the British Empire Hodge looks intently at the structural constraints bureaucratic fissures and contradictory imperatives that beset and ultimately overwhelmed the late colonial development mission in sub Saharan Africa south and southeast Asia and the Caribbean Triumph of the Expert seeks to understand the quandaries that led up to the important

transformation in British imperial thought and practice and the intellectual and administrative legacies it left behind
