Social Classes and Social Credit in Alberta Edward Bell, 1994-05-31. For years scholars have maintained that Social Credit was a protest on the part of small-scale farmers who fought against their disadvantaged position in advanced capitalism by rejecting central Canada's control of the prairie region. The protest is usually described as conservative and its supporters portrayed as small agrarian capitalists who combined their opposition to regional exploitation with a firm commitment to capitalism. Based on a review of census materials, on occupations, election results and the party's statements and appeals, Bell reveals that this traditional interpretation is misguided on several counts. He provides a greatly revised picture of the movement's popular class base and its goals and motives and shows that it was far more radical than commonly believed. The theory of social movements Bell draws from this analysis is applicable not only to Social Credit but to social movements in general.

Social Classes and Social Credit in Alberta will be of particular interest to sociologists, political scientists and historians concerned with Canadian social movements and elections and the political history of the Great Depression.

Social Protest and Policy Change Marco Giugni, 2004-06-10. While movement activists spend much of their time and energy trying to change the world and we think that social movements often matter, our theoretical and empirical knowledge in this field is still relatively poor. *Social Protest and Policy Change* offers a systematic and empirically grounded analysis of the impact of three major contemporary movements on public policy. Following a comparative and historical perspective, the author argues that the policy impact of social movements is facilitated by the presence of favorable political opportunity structures and more precisely by the presence of institutional allies among the elites and by a favorable public opinion. Furthermore, the very content of the movements' demands also plays a role insofar as the power holders are more willing to make concessions on certain issues than on others. On the basis of a historical overview of the mobilization of ecology, antinuclear and peace movements in the United States, Italy and Switzerland and using a unique body of original data, the book presents the results of time series analyses showing the joint effect of protest, political alliances and shifts in public opinion for movements that do not address issues that pose too serious a threat to the power holders.
