Social Policies for Children Irwin Garfinkel, Jennifer L. Hochschild, Sara S. McLanahan, 2001-08-09 Successful social policies for children are critical to America's future Yet the status of children in America suggests that the nation's policies may not be serving them well Infant and child mortality rates in the U S remain high compared to other western industrialized nations child poverty rates have worsened in the past decade poor health care child abuse and inadequate schooling and child care persist This book presents a new set of social policies designed to alleviate these problems and to help satisfy the needs of all children The policies deal with the seven critical domains affecting children from birth through the passage to adulthood child care schooling transition to work health care income security physical security and child abuse While nearly everyone agrees that children are in trouble there is considerable debate over what kind of trouble they are in why this is so and whether government can or should more actively seek to solve these problems Americans are evenly divided on the question of whether children's problems are more economic or moral in origin The seven proposals in this volume both reflect and cut across ideological disagreements Some call for more government others call for less and all call for different government methods for achieving socially agreed upon goals Recommendations include replacing major welfare programs and tax subsidies with a set of universal policies including national health insurance child support assurance and universal child care offering publicly funded vouchers to allow poor children in inner city neighborhoods to choose their own schools using both private and governmental resources to get tough on crime through more stringent criminal justice policies and dramatic social measures and expanding apprenticeship programs for non college bound youths In addition to the editors the contributors are Barbara R Bergmann and Robert I Lerman America

Social Policy for Children and Families Jeffrey M. Jenson, 2006 Winner of the SRA Social Policy Award for Best Edited Volume 2006 2008 Jenson Fraser and their impressive contributors have provided us with something all too rare in the child family services literature a truly integrative volume They argue cogently for a cross systems perspective an orientation to developmental risk protective factors and a strategic process for identifying most favorable targets for intervention The summaries of different service domains and the editor's emphasis on crafting the proper policy

context for the integration of evidence based practices make this volume a must read for seasoned policy makers as well as beginning practitioners This book will be an important resource for all involved in the kind of creative science based innovation so desperately needed in the child family services field James K Whittaker University of Washington What a book A must read for those who provide services to at risk children and their families Jensen and Fraser call attention to the profession's blatant unwillingness to systematically draw upon existing research and translate it to policy to advance the design of programs that remediate and prevent mental and physical health problems among the nation's youth The application of the public health framework to programs and policies adds value to the usual suspects of perspectives frameworks drawn upon by the social work profession This book is very consistent with the ideas expressed in related professional and social science literatures as well as that of federal and private funding sources The authors boldly call for the triangulation of relevant theories and models of risk and resilience and make a major contribution to social work research by advocating for the translation of empirical evidence into practical application Paula Allen Meares University of Michigan School of Social Work We now know more than ever about why some children and adolescents develop social and health problems such as sexually transmitted diseases drug use and delinquency However this knowledge is not yet systematically applied to policy or program design resulting in poorly integrated and often duplicative services for children and families Social Policy for Children and Families A Risk and Resilience Perspective uses a unique framework to help students understand effective public policy development Authors Jeffrey M Jensen and Mark W Fraser argue that a public health framework rooted in ecological theory and based on principles of risk protection and resilience is essential for the successful design of social policy This book applies the authors conceptual model across the substantive areas of social policy including child welfare education mental health health developmental disabilities substance use and juvenile justice Key Features Applies a risk and resilience model to help readers understand and develop effective public policies for children youth and families Offers recommendations for ways to advance a public health framework in policy design implementation and evaluation Includes case studies discussion questions and web based resources to prompt critical thinking and future research Social Policy for Children and Families is designed for undergraduate and graduate students studying social welfare policy in the field of Social Work It can also be used in a variety of Political Science Public Policy and Sociology courses

child care schooling transition to work health care income security physical security and child abuse While nearly everyone agrees that children are in trouble there is considerable debate over what kind of trouble they are in why this is so and whether government can or should more actively seek to solve these problems Americans are evenly divided on the question of whether children's problems are more economic or moral in origin The seven proposals in this volume both reflect and cut across ideological disagreements Some call for more government others call for less and all call for different government methods for achieving socially agreed upon goals Recommendations include replacing major welfare programs and tax subsidies with a set of universal policies including national health insurance child support assurance and universal child care offering publicly funded vouchers to allow poor children in inner city neighborhoods to choose their own schools using both private and governmental resources to get tough on crime through more stringent criminal justice policies and dramatic social measures and expanding apprenticeship programs for non college bound youths In addition to the editors the contributors are Barbara R Bergmann and Robert I Lerman American University Douglas J Besharov American Enterprise Institute John J DiIulio Jr Princeton University Julia Graham Lear George Washington University and Diane Ravitch New York University
