Decentralization, Local Governance, and Social Wellbeing in India Rani Mullen, 2017-05-18 Over the past three decades decentralization has been seen as the means for allowing local governments to become more accountable and for encouraging the deepening of democracy and the building of village communities By drawing on original village level case studies of six villages in three different Indian states this book presents a systematic analysis of the impact of decentralization on the delivery of social services at the local level within India Supplementing national and state level data and analyzing the different historical legacies in each state the book argues that decentralization is not simply a function of the structure of the decentralization program or of the relationship between higher tiered and local government Rather the possibility of decentralization affecting social outcomes depends on several interacting factors including the distribution of power among local elites the dynamics of political competition and the level of civil society mobilization By examining constitutionally mandated political decentralization across India this book identifies the circumstances under which local government structures can lead to improved social services and societal wellbeing as well as presenting a substantial contribution to studies on South Asian Politics and Local Government

**Transatlantic Space Politics** Sheng-Chih Wang, 2013-05-29 This book examines transatlantic politics through an analysis of 60 years of US European strategic interaction in space The significance of space politics for the study of transatlantic relations receives surprisingly little scholarly attention As a theatre of interaction transatlantic space politics reflects the vicissitudes of European and US power in the international system An understanding of space politics is therefore vital in understanding the status and prospect of the transatlantic order Using established IR theories the author investigates transatlantic space politics and proposes a theoretical explanation which is distinct from the conventional wisdom of the transatlantic security community More specifically he distinguishes between the constitutive and regulatory effects of the transatlantic security community an approach rarely employed in other research in the field Overall this book suggests not only that the transatlantic institutional pillar requires repair but also that the ideational factors need to be revitalised in order to consolidate the transatlantic alliance This book will be of much interest to students of space power transatlantic politics strategic studies foreign policy and IR security studies in general

**The Financialisation of Social Reproduction in the Age of Neoliberalism: From Theory to Case Studies** Ben Fine, 2024-12-02 Drawing upon comprehensive research across five

countries including case studies of housing water and health comprehensive theoretical and empirical accounts are offered of the impact of financialisation on economic and social reproduction alongside the corresponding material cultures of neoliberalism Economic is understood as embedded within social reproduction with neoliberalism as the current stage of capitalism fundamentally underpinned by but not reducible to the financialisation of everyday life Considerable emphasis is placed upon the variegated outcomes attached to the neoliberalisation of social reproduction as highlighted by the comparative study of economic and social provisioning across different countries and sectors International Cooperation, Competition Authorities and Transnational Networks Mateusz Blachucki, 2023-11-30 This book presents a comprehensive study of the emergence functioning and evolution of international cooperation among competition authorities It presents an in depth look at network cooperation taking place within international organisations as well as networks based on binding international agreements and various informal networks among others It further identifies and analyses the forms of international cooperation among national competition authorities NCAs that are taking place within transnational competition networks The book classifies these forms of cooperation by grouping them into three stages soft developed and enhanced cooperation discussing each in detail It thus reflects the evolution of the international cooperation process and provides insights as to its possible development This work will be of interest to researchers academics and advanced students in the fields of competition law public administration international relations and those interested in international competition law and its contribution to global public governance Understanding Family Change and Variation Jennifer A. Johnson-Hanks, Christine A. Bachrach, S. Philip Morgan, Hans-Peter Kohler, 2011-08-27 Fertility rates vary considerably across and within societies and over time Over the last three decades social demographers have made remarkable progress in documenting these axes of variation but theoretical models to explain family change and variation have lagged behind At the same time our sister disciplines from cultural anthropology to social psychology to cognitive science and beyond have made dramatic strides in understanding how social action works and how bodies brains cultural contexts and structural conditions are coordinated in that process Understanding Family Change and Variation Toward a Theory of Conjunctural Action argues that social demography must be reintegrated into the core of theory and research about the processes and mechanisms of social action and proposes a framework through which that reintegration can occur This framework posits that material and schematic structures profoundly shape the occurrence frequency and context of the vital events that constitute the object of social demography Fertility and family behaviors are best understood as a function not just of individual traits but of the structured contexts in which behavior occurs This approach upends many assumptions in social demography encouraging demographers to embrace the endogeneity of social life and to move beyond fruitless debates of structure versus culture of agency versus structure or of biology versus society *Research in Education* ,1974
