Social Problems Rawlein G. Soberano, 1984 *The Sociology of Social Problems* Adam Jamrozik, Luisa Nocella, 1998-07-13 Social problems such as unemployment poverty and drug addiction are a fact of life in industrialised societies This book examines the sociology of social problems from interesting and challenging perspectives It analyses how social problems emerge and are defined as such who takes responsibility for them who is threatened by them and how they are managed solved or ignored The authors examine and critique existing theories of social problems before developing their own theoretical framework Their theory of residualist conversion of social problems explains how certain social problems threaten legitimate power structures so that problems of a social or political nature are transformed into personal problems and the helping professions are left to intervene This book will become a key reference on class inequality and social intervention and an important text for students in sociology and social work courses **Reconsidering Social**

Constructionism Gale Miller, 2017-09-29 With the impact of social interactionist and ethnographic methodology twenty five years ago the research agenda in social problems began to shift its focus giving rise to the Social Constructionism movement The present volume and the related shorter text Constructionist Controversies review the substantial contributions made by social constructionist theorists over that period as well as recent debates about the future of the perspective These contributions redefine the purpose and central questions of social problems theory and articulate a research program for analyzing social problems as social constructions A generation of theorists has been trained in the constructionist perspective and has extended it through numerous analyses of diverse aspects of contemporary social life The debates in this volume pose fundamental questions about the major assumptions of the perspective the ways in which it is practiced and the purposes of social problems theory Their point of departure is Ibarra and Kitsuse's essay cutting new theoretical ground in calling for investigating vernacular resources especially rhetorical forms in the social problems process Contributors are forceful proponents both within and outside of the social constructionist community who take a broad array of positions on the current state of social problems theory and on the rhetorical forms that need exploring They also lay down the general lines for diverse and often competing programs for the future development of the constructionist agenda **The**

sociologists and graduate students conducting research *Constructing Social Problems* Malcolm Spector, John I. Kitsuse, 2017-07-05 There is no adequate definition of social problems within sociology and there is not and never has been a sociology of social problems That observation is the point of departure of this book The authors aim to provide such a definition and to prepare the ground for the empirical study of social problems They are aware that their objective will strike many fellow sociologists as ambitious perhaps even arrogant Their work challenges sociologists who have over a period of fifty years written treatises on social problems produced textbooks cataloguing the nature distribution and causes of these problems and taught many sociology courses It is only natural that the authors work will be viewed as controversial in light of the large literature which has established a sociology of a wide range of social problems the sociology of race relations prostitution poverty crime mental illness and so forth In the 1970s when the authors were preparing for a seminar on the sociology of social problems their review of the literature revealed the absence of any systematic coherent statement of theory or method in the study of social problems For many years the subject was listed and offered by university departments of sociology as a service course to present undergraduates with what they should know about the various social pathologies that exist in their society This conception of social problems for several decades has been reflected in the substance and quality of the literature dominated by textbooks In *Constructing Social Problems* the authors propose that social problems be conceived as the claims making activities of individuals or groups regarding social conditions they consider unjust immoral or harmful and that should be addressed This perspective as the authors have formulated it conceives of social problems as a process of interaction that produces social problems as social facts in society The authors further propose that this process and the social facts it produces are the data to be researched for the sociology of social problems This volume will be of interest to those concerned with the discipline of sociology especially its current theoretical development and growth

Religion and Social Problems Titus Hjelm, 2011-01-21 Although students and scholars of social problems have often acknowledged the role of religion no thorough examinations of the relation between the two have emerged This volume fills this gap by providing a definitive work on the role of religion in assessing constructing and solving social problems Contributors chart the relation between religion and social problems exploring such case studies as the impact of religion on drugs and alcohol use among Muslims the rising importance that religion is given in social policy the role of the Orthodox and Catholic churches in tackling social problems in post communist East Europe and the contested role of religion in the national and international politics of contemporary Japan *Religion and Social Problems* is a broad and path breaking contribution to the fields of sociology of religion sociology of social problems and religious studies *Researching Social Problems* Amir Marvasti, A. Javier Treviño, 2019-06-11 This book covers a wide range of contemporary methods for researching social problems and connects these approaches to the broader substance and theories of social problems Expository and discursive in approach chapters follow a uniform structure with each offering research examples and a broad

description of the related method and its theoretical context together with a how to guide for applying that method using substantive examples from the field of social problems For every method explored there is a research example that fully reviews and illustrates the application of the particular method before giving a full assessment of the method s strengths and weaknesses and latest developments With chapters exploring survey interviews in depth interviews narrative inquiry institutional ethnography participatory action research auto ethnography Actor Network Theory experimental research visual research methods and research ethics *Researching Social Problems* will appeal to scholars and students of sociology and politics working in the fields of research methods and social problems *Social Problems, Law, and Society* Kathryn A. Stout, Richard A. Dello Buono, William J. Chambliss, 2004-07-14 This volume represents a critical issue oriented approach to law and society emphasizing its important relationship to contemporary social problems Various empirical studies within the text explore the contradictory dynamics of class as they relate to race and gender in both a national and global context illustrating the dialectical interplay between the state and social movements in the context of the larger political economy

Handbook of Constructionist Research James A. Holstein, Jaber F. Gubrium, 2013-10-21 Constructionism has become one of the most popular research approaches in the social sciences But until now little attention has been given to the conceptual and methodological underpinnings of the constructionist stance and the remarkable diversity within the field This cutting edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research how it is put into practice in multiple disciplines and where it may be headed in the future The volume critically examines the analytic frameworks strategies of inquiry and methodological choices that together form the mosaic of contemporary constructionism making it an authoritative reference for anyone interested in conducting research in a constructionist vein

The New Pediatrics Dorothy Pawluch, 2017-07-05 When antibiotics became readily available in the 1950s the danger of life threatening infectious childhood diseases virtually disappeared In that era pediatricians broadened the core professional task of their specialty the prevention and treatment of such diseases to incorporate the behavioral and psychosocial problems of children and adolescents Pediatricians themselves began to refer to this changing emphasis as the new pediatrics and to see the trend as a natural progression of their specialty into new areas of care At the same time there arose widespread disaffection among practicing general pediatricians defection to other areas of practice and a decline in the popularity of pediatrics as a specialty choice In analyzing the emergence of the new pediatrics as a case study within medical sociology Pawluch shows how professional concerns and interests influence debate around social problems As sociologists began to take greater interest in the problems of childhood and as children s lives became increasingly medicalized as some have argued it is at least in part because of pediatricians willingness to endorse medical definitions for certain social problems and to provide treatment for them Pawluch s underlying concern is that medical professionals have begun to make claims for authority in the definition of what constitutes the social problems of childhood Among the topics she examines are the

dissatisfied pediatrician syndrome the potential for a crisis in oversupply of pediatricians and competing providers of services the push for expansion into new areas of care and possible future developments in this specialty Announcement Columbia University. Experience Wing-Chung Ho, 2019-01-15 Ho addresses two fundamental theoretical questions about how best to practice ethnographic inquiries to obtain qualitative experience near and shareable accounts of human living. The first question is regarding the epistemology of ethnography. Ho posits that writing is epistemologically prior to the researcher's fieldwork experience in the production of ethnographic knowledge. This stance is developed using the theories of hermeneutics put forward by Paul Ricoeur and Hans Georg Gadamer, who both consider that once a text is produced its meaning is dissociated from the intention of the author. The second question is what is the putative object that the ethnographer writes about. Ho argues that lived experience (*Erlebnis*) offers such an ethnographic object. Since the lived experience that an ethnographer experiences during fieldwork cannot be studied directly, further theorizations of lived experience are necessary. Ho underscores both the non-discursivity and transcendence of lived experience in the lifeworld and the way power is clandestinely imbued in everyday life in shaping subjectivity and practice. This theorization brings together Alfred Schutz's lifeworld theory and Michel Foucault's power-knowledge nexus. The result is a general theory of experience that is pertinent for ethnographic inquiries. By addressing these two fundamental questions and offering novel angles from which to answer them, this book offers refreshed epistemological guidelines for conducting ethnographic research for scientific reasoning. More importantly, this book also provides a crucial knowledge base for comprehending the current epistemological debates inherent in the production of ethnographic knowledge and furthering discussions in the field.
