## **Social Psychology Readings From The First Century:**

Reading Minjung Theology in the Twenty-First Century Yung Suk Kim, Jin-Ho Kim, 2013-09-16 This edited volume brings Ahn Byung Mu's minjung theology into dialogue with twenty-first century readers. Ahn Byung Mu was one of the pioneers of Korean minjung theology. The centerpiece of his minjung theology is focused on the Greek word *ochlos*, understood as the divested, marginalized, powerless people. Part 1 introduces readers to his life and theological legacy. Part 2 includes four important writings of Ahn Byung Mu: *Jesus and Minjung in the Gospel of Mark*, *Minjung Theology in the Gospel of Mark*, *The Transmitters of Jesus Event Tradition*, and *Minjok Minjung and Church*. Part 3 contains a collection of articles from international scholars who evaluate and engage Ahn's *ochlos* minjung theology in their own fields and formulate critical readings of minjung theology. Responses include postcolonial black theology and feminist perspectives. **Social Work for the Twenty-first Century** Francis K. O. Yuen, 2006-04-30 This work is a critical analysis of the various aspects of social work education and practice. It argues that social work is still a profession searching for a firm identity and a clear and respectful image. The incorporation of science and scientific approach into social work education and practice appears to be the key for the profession to continue to grow and gain its rightful place in the professional and academic communities. Lastly, this book is intended to generate productive dialogues to advance the profession and its educational processes. **Social Catholicism for the Twenty-First Century?--Volume 1** William F. Murphy, 2024-09-12 This first of two volumes introduces the tradition of social Catholicism not only in its earlier realizations but regarding how a contemporary renewal might address the crisis in which constitutional democracies and the postwar liberal order are under assault by populist and even neo-fascist movements that could soon usher in a frighteningly dark future unless a broad movement in defense of constitutional democracy quickly arises. In this context, some of the most influential voices among American Catholics are focused on criticizing liberal democracy, on advocating a postliberal order, and the establishment of a Catholic integralist state, or on insisting that abortion should be the primary sociopolitical concern for Catholics. Treating these threats to democracy as largely irrelevant, this volume shows the rich tradition of social Catholicism and how the Social Doctrine of the Church came to appreciate the key tenets of constitutional democracy. As Pope Benedict XVI wrote, this social doctrine leads us to take a stand for the common good, to take the institutional or political path of charity, to be solicitous for the institutions that give structure to the life of society, juridically, civilly, politically, and culturally. It engages some of the most influential contemporary Catholic thinkers and argues that they too should recognize the grave threats facing the human family and join in working to defend and renew our constitutional democracy. **Leadership for the Twenty-First Century** Joseph Rost, 1993-02-18 This illuminating study critiques the concept of leadership as understood in the last 75 years and looks to the twenty-first century for a reconstructed understanding of leadership in the postindustrial era. More similarities in past decades were found than had been thought. The thread throughout Rost's book is that leadership was conceived of as good

management He develops a new definition and paradigm for leadership in this volume that distinguishes leadership from management in fundamental ways The ethics of leadership from a postindustrial perspective completes the paradigm The book concludes with suggestions that can be immediately utilized in helping to transform our understanding of leadership

**George Herbert Mead in the Twenty-first Century** F. Thomas Burke, Krzysztof Skowronski, 2013-03-22 This volume is composed of extended versions of selected papers presented at an international conference held in June 2011 at Opole University the seventh in a series of annual American and European Values conferences organized by the Institute of Philosophy Opole University Poland The papers were written independently with no prior guidelines other than the obvious need to address some aspect of George Herbert Mead's work While rooted in careful study of Mead's original writings and transcribed lectures and the historical context in which that work was carried out these papers have brought that work to bear on contemporary issues in metaphysics epistemology cognitive science and social and political philosophy There is good reason to classify Mead as one of the original classical American pragmatists along with Charles Peirce William James and John Dewey and consequently as a major figure in American philosophy Nevertheless his thought has been marginalized for the most part at least in academic philosophy It is our intention to help recuperate Mead's reputation among a broader audience by providing a small corpus of significant contemporary scholarship on some key aspects of his thought

Religious Fundamentalism Peter Herriot, 2008-09-25 How does a religious fundamentalist come to embrace a counter cultural world view Fundamentalism can be analysed from a variety of perspectives It is a type of belief system which enables individuals to make sense of their lives and provides them with an identity It is a social phenomenon in which strictly religious people act according to the norms values and beliefs of the group to which they belong It is a cultural product in the sense that different cultural settings result in different forms of fundamentalism And it is a global phenomenon in the obvious sense that it is to

be found everywhere and also because it is both a reaction against and also a part of the globalising modern world Religious Fundamentalism deals with all of these four levels of analysis uniquely combining sociological and psychological perspectives and relating them to each other Each chapter is followed by a lengthy case study and these range from a close textual analysis of George W Bush s second inaugural speech through to a treatment of Al Qaida as a global media event This book provides a comprehensive social scientific perspective on a subject of immense contemporary significance and should be of use both to university students and also to students of the contemporary world

*Reading Genesis after Darwin* Stephen C Barton, David Wilkinson, 2009-11-11 Charles Darwin's *On the Origin of Species* has changed the landscape of religious thought in many ways There is a widespread assumption that before Darwin all Christians believed that the world was created some 6 000 years ago over a period of 6 days After Darwin the first chapters of Genesis were either rejected totally by skeptics or defended vehemently in scientific creationism This book tells a very different story Bringing together contributions from biblical scholars historians and contemporary theologians it is demonstrated that both Jewish and Christian scholars read Genesis in a non literal way long before Darwin Even during the nineteenth century there was a wide range of responses from religious believers towards evolution many of them very positive Stephen C Barton and David Wilkinson argue that being receptive to the continuing relevance of Genesis today regarding questions of gender cosmology and the environment is a lively option

Integrative Governance: Generating Sustainable Responses to Global Crises Margaret Stout, Jeannine M. Love, 2018-07-20 Dominant governance theories are drawn primarily from Euro American sources including emergent theories of network and collaborative governance The authors contest this narrow view and seek a more globally inclusive and transdisciplinary perspective arguing such an approach is more fruitful in addressing the wicked problems of sustainability including social economic and environmental crises This book thus offers and affirms an innovative governance approach that may hold more promise as a universal framework that is not colonizing in nature due to its grounding in relational process assumptions and practices Using a comprehensive Governance Typology that encompasses ontological assumptions psychosocial theory epistemological concepts belief systems ethical concepts political theory economic theory and administrative theory the authors delve deeply into underlying philosophical commitments and carry them into practice through an approach they call Integrative

Governance The authors consider ways this approach to radical self governance is already being implemented in the prefigurative politics of contemporary social movements and they invite scholars and activists to imagine governance in contexts of social economic and environmental interconnectedness to use the ideal type as an evaluative tool against which to measure practice and to pursue paradigmatic change through collaborative praxis **What Readers Do** Beth
