Social Reform:

Dilemmas of Social Reform Peter Marris, 2018-02-06 This title is a classic work on social reform. It is an account of the origins and development of community action from its beginnings in the Ford Foundation Gray Area Programs and the President's Committee on Juvenile Delinquency through the rise and decline of the War on Poverty and the Model Cities program. In the ruthlessly impartial examination of various poverty programs, two social scientists, one British, one American, explain why programs of such size and complexity have only a minimal chance of success. They describe the realities of reform and point up how the conservatism of bureaucracy, the rivalries among political and administrative jurisdictions, and the apathy of the poor have often hindered national and local efforts. On the other hand, they show how these obstacles can be overcome by an imaginative combination of leadership, democratic participation, and scientific analysis. This second edition also contains a new chapter that was not included in the first edition. This new chapter tries to set the study in a broader context, first by interpreting the political motives and constraints that led to the adoption of community action as a principal strategy of a nationwide war on poverty, and second by discussing the underlying weaknesses of democracy that community action implied and sought to tackle. Distinguished by an analysis of the major critics of community action, the book provides a balanced perspective of the movement against its many foes. It is important reading for anyone engaged in planning or community action, whether as organizer, consultant, official, or politician.

The architecture of social reform Isabel Rousset, 2022-06-07 The architecture of social reform explores the fascinating intellectual origins of modern architecture's obsession with domesticity. Copiously illustrated, Rousset's revealing analysis demonstrates how questions over aesthetics, style, urbanization, and technology that gripped the modernist imagination were deeply ingrained in a larger concern to reform society through housing. The increasing demand for new housing in Germany's rapidly growing cities fostered critical exchanges between a heterogeneous group of actors, including architects, urban theorists, planners, and social scientists, who called for society to be freed from class antagonism through the provision of good, modest, traditionally minded domestic design. Offering a compelling account of architecture's ability to act socially, the book provocatively argues that architectural theory underwent its most critical epistemological transformation in relation to the dynamics of modern class politics long before the arrival of the avant garde.

Music, Morality and Social Reform in Nineteenth-century Britain Paul Watt, 2023 A pioneering work which delves into and reveals the links between music, moral instruction, and social reform. This book discusses the role of music in programmes of personal improvement and social reform in nineteenth-century Britain. The pursuit of morality through music was designed not just to improve personal and communal character but to affect social change and transformation. The book examines the musical education of children, women, and men through a variety of literature published for various educational settings, including mechanics institutes. It also considers the role of

music in narratives of social programs and community building projects that sought to promote utility well being and freedom from the strictures of Christianity as the dominant moral and cultural force The first book to connect the threads between music moral instruction and social reform across the educational life cycle in nineteenth century Britain it shows how these threads are found in unlikely places such as games manners books economics treatises and short stories It deftly illustrates the links between everyday life popular culture and discourses of morality and social reform of the period

Business and Social Reform in the Thirties Alvin Finkel, 1979-01-01 This book challenges the commonly accepted view that governments enacted social reforms in the 1930s in response to demands for more equitable redistribution of wealth in a time of trouble robbing from the rich to give to the poor Alvin Finkel demonstrates conclusively that Canadian big business was overwhelmingly in favour of more state intervention during the Thirties in the economic and social sphere Private enterprise in Canada has always depended on government aid capital grants high tariffs the repression of organized labour and in the 1930s the corporations need for help was more acute than ever before They realized that the capitalist system could not survive without legislated structural reforms that would provide safeguards for private investment and profit under the guise of social welfare Examining the emergence of an unprecedented intertwining of business and
