The evolution of public relations research – an overview

Abstract

The field of public relations is often misunderstood, due to its hybridity, complexity and competing perspectives within the field of scholarship. This essay, which is based on extensive engagement with literature conducted over decades of teaching and researching the subject, outlines the main schools of thought within the field. These are summarised as a) Excellence; b) Advocacy; c) Dialogue; and d) Critical and Cultural approaches. Each perspective reflects variations in understanding of the role of public relations in theory and practice, ranging from an idealised conceptualisation of the practitioner to a demonised view of the practice. It refers throughout to different attitudes to ethics found within these schools, as approaches to ethics provide insight into understandings of the role of public relations within society. The piece concludes with reflections on the growing engagement with promotional culture and emerging research directions.

Keywords

Excellence, rhetoric, critical theory, promotional culture, ethics.

1. Introduction

When I present to colleagues in the fields of cultural or communication studies I am frequently met with astonishment as I unpack the multiple perspectives that comprise the academic terrain of public relations. They have conceptualised public relations as monolithic and utterly toxic. Meanwhile, many scholars within public relations characterise it as a key force in the democratic process and a contributor to social good.

As I have written elsewhere (Fawkes, 2007, 2012 & 2015) this comprises a classic schism between the idealised and the demonised, or what Carl Jung called ‘Persons’ and ‘Shadows.’ Rather than revisit that theme, I set out the different schools of thought within public relations scholarship, to help elucidate the diverging foundations on which these approaches are built. The essay concludes with remarks concerning the shift from the study of public relations as a management discipline to a driver of promotional culture.

Throughout this narrative I examine the role of ethics in different approaches, as this constitutes the core of any profession’s relationship with the society it claims to serve. Considering the competing views of ethics helps illuminate the lacunae between approaches to public relations.

My perspective is broadly that of a critical scholar, seeking to challenge assumptions and note where ideals have become normative, for example. But given that my aim here is to ‘map’ the field of scholarship, I will try and present the different positions from within those

Social Science for What? Alice O'Connor, 2007-04-02 Much like today the early twentieth century was a period of rising economic inequality and political polarization in America But it was also an era of progressive reform a time when the Russell Sage Foundation and other philanthropic organizations were established to promote social science as a way to solve the crises of industrial capitalism In *Social Science for What* Alice O'Connor relates the history of philanthropic social science exploring its successes and challenges over the years and asking how these foundations might continue to promote progressive social change in our own politically divided era The philanthropic foundations established in the early 1900s focused on research which while intended to be objective was also politically engaged In addition to funding social

science research in its early years the Russell Sage Foundation also supported social work and advocated reforms on issues from child welfare to predatory lending This reformist agenda shaped the foundation s research priorities and methods The Foundation s landmark Pittsburgh Survey of wage labor conducted in 1907 1908 involved not only social scientists but leaders of charities social workers and progressive activists and was designed not simply to answer empirical questions but to reframe the public discourse about industrial labor After World War II many philanthropic foundations disengaged from political struggles and shifted their funding toward more value neutral academic social inquiry in the belief that disinterested research would yield more effective public policies Consequently these foundations were caught off guard in the 1970s and 1980s by the emergence of a network of right wing foundations which was successful in promoting an openly ideological agenda In order to counter the political in roads made by conservative organizations O Connor argues that progressive philanthropic research foundations should look to the example of their founders While continuing to support the social science research that has contributed so much to American society over the past 100 years they should be more direct about the values that motivate their research In this way they will help foster a more democratic dialogue on important social issues by using empirical knowledge to engage fundamentally ethical concerns about rising inequality O Connor s message is timely public interest social science faces unprecedented challenges in this era of cultural warfare as both liberalism and science itself have come under assault Social Science for What is a thought provoking critique of the role of social science in improving society and an indispensable guide to how progressives can reassert their voice in the national political debate A Volume in the Russell Sage Foundation s Centennial Series **Hunger** James Vernon,2007-11-30 This book draws together social cultural and political history to show us how we came to have a moral political and social responsibility toward the hungry Vernon forcefully reminds us how many perished from hunger in the empire and reveals how their history was intricately connected with the precarious achievements of Britain s welfare state Reassessing the Relationship between Marketing and Public Relations Lisa Dühring,2017-04-24 Lisa D hring reconstructs the relationship between public relations and marketing research on a metatheoretical level She presents a concise systematization of the theoretical discourse in both disciplines since the beginning of the twentieth century by differentiating key phases of development and evaluating current research approaches This study argues for a stronger connection of both disciplines and a better profiling within the mother disciplines of communication and business studies by fostering critical and interpretative approaches This book is strongly recommended to everybody interested in the history and epistemology of marketing and public relations theory and the relationship between both fields *Annals of the American Academy of Political and Social Science* ,1926 **Strategic Communication for Non-Profit Organisations** Evandro Oliveira,Ana Duarte Melo,Gisela Goncalves,2019-03-28 Communication in the public sphere as well as within organizational contexts has attracted the interest of researchers over the past century Current forms of citizen engagement and community development partly enabled through digital

communication have further enhanced the visibility and relevance of non profit communication These are performed by the civil society which is the organized expression of the values and interests of society Castells 2008 in the public sphere Non profit communication feeds the public sphere as the discursive processes in a complex network of persons institutionalized associations and organizations whereas those discourses are a civilized way of disagreeing openly about essential matters of common concern Jensen 2002 Despite the relevance in the public sphere non profit communication was never properly defined within communication research The aim of the present book is to offer an overview and report on Strategic Communication for Non Profit Organisations and the Challenges and Alternative Approaches Considering the assumption that a key principle of strategic communication is the achievement of organisational goals the majority of research developed in the field has used business environments to develop theories models empirical insights and case studies Here we take a step towards new approaches centred on the concept of non profit in various dimensions and from various perspectives showing the diversity and complexity around this subject and at the same time the need of further theoretical and empirical work that provides frameworks and also tools for further understanding of the phenomena **Big Ideas in Public**
