theorising Second that the concept of sociological research is being taught in a totally false way because of this and encourages research within a wholly academic environment Third that the current unpopularity of sociology with academics prospective students and politicians is no coincidence but a reflection of the conditions under which sociology is now produced and practised In *Sociology and Social Research* the authors suggest substantial changes in sociological research the way in which it is carried out and the conditions under which it is undertaken Their book is a timely warning to fellow sociologists when the profession is under attack as a result of public expenditure cuts
