However it is not uncommon for these studies to be affected by methodological problems including but not limited to the problems of overgeneralization misuse of measurements misinterpretation of findings and the interpretation of differences not as diversity but as deficiencies. Simply put the application of conventional research strategies with a different population does not qualify a study as culturally competent research. This pocket guide adopts ethnography as a meta framework for conducting culturally competent research. This suggests the following components of culturally competent research 1 a collaborative social relationship with the study group and community 2 use of firsthand long term participant

observation 3 use of self as research instrument 4 researcher as learner 5 a contextual view of phenomena 6 a holistic perspective 7 an interactive reactive research process 8 a cross cultural frame of reference and 9 a spirit of discovery Each phase of research is described and incorporated throughout the process from framing and designing the study to data collection management and analysis to final analysis and report writing and to dissemination to a variety of audiences With a practical step by step approach this book provides social work researchers doctoral students and professionals with a model for conducting culturally competent research with and close to the lived experience of diverse populations and groups
