Multidimensional Poverty Measurement Udaya Wagle,2009-04-05 Conceptualization and measurement of poverty have traditionally relied on purely economic approaches with income or consumption as the only indicator Multidimensional approaches have increasingly been used to understand poverty but have yet to be fully operationalized This book uses factor analysis and structural equations modelling to develop a multidimensional framework that integrates capability and social inclusion as additional poverty indicators The empirical relevance of this methodological contribution is demonstrated through its application in the United States and Nepal The proposed approach not only helps to identify different categories of the poor but also to more accurately target resources and policies of poverty alleviation The book will therefore be an important reference for professionals in development agencies as well as for poverty and policy researchers *Evaluating Family Support* Ilan Katz,John Pinkerton,2003-08-01 The delivery of effective family support is a key global child welfare issue yet there is little consensus on what constitutes family support or what the best ways are to evaluate it Evaluating Family Support Thinking Internationally Thinking Critically offers a full review of the conceptual and operational problems involved in this complex and topical field Ilan Katz and John Pinkerton have brought together a team of experienced child

care policy analysts and evaluators to present the current state of critical thinking alongside detailed international case studies The chapters offer revealing glimpses into the nature of family support across the world as well as an overview of the challenges facing both practitioners and researchers
