Chura,2013-11-05 The book analyzes American literature about middle or upper class characters who voluntarily descend the class ranks to experience vital contact by living or associating temporarily with the poor The motivations of these characters and historical figures such as John Reed and Walter Wyckoff range from straightforward bohemian slumming among the exotics to more complex and psychologically wrought investigations of cross class empathy The study begins by charting downclasing processes in works of canonical nineteenth century authors including Melville Hawthorne James Howells and Jewett It then undertakes an original analysis of John Reed s involvement with the 1913 Paterson silk workers strike as a context for understanding Ernest Poole s now forgotten but then best selling fictionalization of the strike in his novel *The Harbor* In other richly historicized chapters it analyzes distillations of class radicalism in several works by Upton Sinclair in the early drama of Eugene O Neill and in feminist novels of the 1910s by Elia Peattie and Clara Laughlin The concluding chapter looks at sophisticated treatments of vital contact in fiction of the 1930s by Dos Passos Steinbeck and Richard Wright The book provides Americanists with important new ways of thinking about various forms of class identification as they developed in the nineteenth and early twentieth centuries *Practising Rhythmanalysis* Yi Chen,2016-10-21 This book

explores rhythmanalysis as a philosophy and as a research method for the study of cultural historical experiences It formulates rhythm as a critical concept which is defined in dialogic relationships to intellectual traditions yet introducing unique philosophical positions that serve to re think ways of conceiving and addressing cultural political issues Engaging with the notion of conjunctural shift which for Stuart Hall captures the ruptured social landscape of Britain in the 1970s the book then puts the method of rhythmanalysis to work by testifying the changing cultural experiences in rhythmic terms This particular rhythmanalytical project instantiates while opening up ways of using rhythmanalysis for exploring cultural historical experiences **Abuse and Violence Towards Young Children** Roy Evans,2017-10-02 Levels of violence abuse

and neglect in early childhood are reported internationally as having reached epidemic proportions The prevalence of all forms of violence to children has been difficult to establish particularly in low and middle income countries However even in countries with a high GDP the sexual abuse of children and young people by predatory adults may continue undetected for

decades In parts of Africa young children are mutilated and killed for religious reasons Physical beatings that injure and break bones are still common in the Western world Pornography and sexual abuse involving young children is propagated worldwide through the internet The prevention of this violence will require substantial shifts in parental and public attitudes to children and the development and support of national systems of preventive legislation The last 20 years has seen the emergence of a body of material which interrogates early childhood violence and neglect in a wider range of global settings particularly those countries with a low GDP This book aims to highlight important features of national and international initiatives which are rooted in findings from systematic research The continued abuse and neglect of children has been attributed to social acceptance not understanding the importance of reporting abuse and the limitations of child welfare systems This book will be of interest to practitioners in health care education and social work services as well as field workers implementing programmes to address all forms of abuse at family community and national level This book was originally published as a special issue of Early Child Development and Care
