Equity and Difference in Physical Education, Youth Sport and Health Fiona Dowling, Hayley Fitzgerald, Anne Flintoff, 2012. Issues of equity remain an essential theme throughout the study and practice of physical education. PE youth sport and health. This important new book confronts and illuminates issues of equity and difference through the innovative use of narrative method, telling stories of difference that enable students, academics and professionals alike to engage both emotionally and cognitively with the subject. The book is arranged into three sections. The first provides an overview of current theory and research on difference and inequality in PE youth sport and health together with an introduction to narrative forms of knowing. The second section includes short narratives about difference that bring to life the key themes and issues in a range of physical activity contexts. The third section draws upon a selection of narratives to offer detailed practical suggestions for how they might be used in or inform teaching sessions. This is the first book to explore issues of equity through narrative and the first to examine the pedagogical value of a narrative approach within PE youth sport and health. With contributions from many of the world's leading equity specialists, it will be invaluable reading for all students, scholars and professionals working in PE youth sport, health, sports development, gender studies and mainstream education programmes.

A Critical History of Health, Sport, and Physical Education Michelle Gorzanelli, Jorge Knijnik, 2025-07-01. This book fills a gap in literature by generating a combined history of Physical Education, PE, School Sport, SS and Health Education, HE in New South Wales (NSW) public schools from 1880 to 2024. It includes broad discussions on how political issues such as the World Wars influenced i) the PE curriculum which was used as a medium to prepare a fit army; ii) the school sport system which acted as an expression of national strength via showcasing sporting prowess on the international stages of the Olympic Games; and iii) the health education curriculum which addressed infectious diseases resulting from poor hygiene associated with poverty. The book also adopts a socio-cultural perspective to the constructs of PE, SS and HE curricula and highlights significant local, national and international historical events and issues as factors driving curriculum developments and paradigm shifts in these subjects in the NSW public education and beyond. It brings new and engendering socio-historical findings to the discipline fields of PE, SS and HE combined with an innovative methodology in critical historiographical studies.

Touch in Sports Coaching and Physical Education Heather

Piper,2014-08-07 In our increasingly risk averse society touch and touching behaviours between professionals and children have become a fraught issue In sports coaching and physical education touching young sports performers and participants has in some contexts come to be redefined as dubious and dangerous Coaches find themselves operating in a framework of regulations and guidelines that create anxiety for them and others and for many volunteer and sometimes professional coaches this fearful context has led them to question the risks and benefits of their continuing involvement in sport Touch in Sports Coaching and Physical Education is the first book to explore this difficult topic in detail Drawing on a series of international studies from the US UK Australia Canada Sweden and elsewhere it presents important new research evidence and examines theories of risk and moral panic that frame the discussion By challenging prevailing orthodoxies the book makes a significant contribution to critical discussion around practice pedagogy politics and policy in sport and physical education and also informs current debates around the nature and quality of all in loco parentis relationships
