The Social Organization of Disease Jochen Kleres, 2017-07-06 Empirically this book is a case study analysis of dissolution processes in German AIDS organizations Indeed why is it that civic organizers start out with a commitment to a cause but end up dissolving their organization This question is exactly what Kleres seeks to tackle within The Social Organization of Disease Focusing on the emotional bases of dissolved German AIDS organizations to develop a typology of civic action and organizing Kleres presents a perspective on non profit organizations that analyses organizational development through the emotional sense making of individual organizers within the light of larger political processes and cultural contexts To this end this volume develops and applies a new methodology for researching emotions empirically expanding the scope of narrative analysis However parallel to this The Social Organization of Disease also explores how shifting discursive processes establish emotional climates and thus impact on state policies and the evolution of AIDS organizing The book would appeal to sociologists and political scientists working in the field of social movements and non profit organisations but it would also appeal to those who are interested in the sociology of emotions It would potentially be of interest to non profit scholars who consider community based organizations volunteerism and advocacy and secondarily to medical sociologists interested in AIDS service organizations Sociology International relations Social Work Political Science May be of interest for NGO activists and or employees and leadership

Protest, Policy, and the Problem of Violence against Women S. Laurel Weldon, 2013-12-09 Violence against women is one of the most insidious social ills facing the world today Yet governmental response is inconsistent ranging from dismissal to aggressive implementation of policies and programs to combat the problem In her comparative study of thirty six democratic governments Laurel Weldon examines the root causes and consequences of the differences in public policy from Northern Europe to Latin America She reveals that factors that often influence the development of social policies do not determine policies on violence against women Neither economic level religion region nor the number of women in government determine governmental responsiveness to this problem Weldon demonstrates for example that Nordic governments take no more action to combat violence against women than Latin American governments even though the Swedish welfare state is often considered a leader in social policy particularly with regard to women s issues Instead the presence of independently organized active women s movements plays a greater role in placing violence against women on the public agenda The breadth and scope of governmental response is greatly enhanced by the presence of an office dedicated to promoting women s status Weldon closes with practical lessons and insights to improve government action on violence against women and other important issues of social justice and democracy

Social Organizations and the Authoritarian State in China Timothy Hildebrandt, 2013-02-18 Received wisdom suggests that social organizations such as non government organizations NGOs have the power to upend the political status quo However in many authoritarian contexts such as China NGO emergence has not resulted in this expected regime change In this book Timothy Hildebrandt shows how NGOs adapt to the changing interests of central and local governments working in service of the state to address social problems In doing so the nature of NGO emergence in China effectively strengthens the state rather than weakens it This book offers a groundbreaking comparative analysis of Chinese social organizations across the country in three different issue areas environmental protection HIV AIDS prevention and gay and lesbian rights It suggests a new way of thinking about state society relations in authoritarian countries one that is distinctly co dependent in nature governments require the assistance of NGOs to govern while NGOs need governments to extend political economic and personal opportunities to exist

Headings Library of Congress,2002 *International Cooperation When Mistrust Deepens* Perri 6,Eva Heims,2025-01-16 In the years leading up to the outbreak of war in 1914 Britain was collaborating closely with Germany on the development of an improved telegraph service despite preparations for war also being made by both countries This cooperation rested upon both states intensive participation in the global regulatory regime for telecommunications Why states commit to cooperating in such multilateral regimes with other states while their relationship struggles with deepening mistrust is a longstanding puzzle As tensions rise among great powers today and international organisations struggle again this puzzle is as important now as it was when international regulatory regimes first emerged The book challenges many of the conventional explanations for this puzzling situation and draws on neo Durkheimian institutional theory to develop a novel explanation It examines the case of Britain s relationship with the first global regulatory regime which was concerned with international telegraphy submarine telegraph cables and radiotelegraphy from the 1860s through to 1914 The regime was created in a time of European wars and growing imperial conflicts Although Britain seriously contemplated leaving the International Telegraph Union in 1901 2 the state went on to deepen cooperation with other countries in telegraphy including with Germany even as preparations for war advanced Drawing on extensive archival sources Perri 6 and Eva Heims show that social organisation in government can cultivate institutional buffering between aspects of external policy which can sustain commitment despite deepening conflict In doing so they show how a neo Durkheimian approach provides a powerful explanation for deepening cooperation even as mistrust rises which has significant implications for understanding state formation Activating China Setsuko Matsuzawa,2019-01-04 This book examines the effects of the transnational social and environmental advocacy of foreign NGOs in China Based on three case studies including China s first participatory development project its first successful case of transnational anti dam activism and its first national park project the book challenges our typical understanding that global forces shape local outcomes Drawing on ethnographic fieldwork in China and archival work in the United States Matsuzawa sheds light on the entrepreneurial behaviors of Chinese activists researchers and government officials She shows that global projects are often substantially transformed by local actors despite the original intentions of their foreign collaborators and even China s central government Thus it is argued that foreign NGOs are not as hegemonic or culturally imperialistic as is commonly viewed Matsuzawa reveals that their goals may

change profoundly as a result of their engagements with local actors on the ground She offers a new theory of transnational advocacy together with an account of the Chinese party state's rising concerns over the influence of foreign NGOs Activating China will be of interest to sociologists and political scientists working in the fields of social movement studies and activism in China

norms in schools are shaped and reinforced by interactions among teachers and students Sociologist Maureen Hallinan shows that students who are challenged intellectually and accepted socially are more likely to embrace school norms and accept responsibility for their own actions Using classroom observations surveys and school records Daniel McFarland finds that group based classroom activities are effective tools in promoting both social and scholastic development in adolescents The Social Organization of Schooling also addresses educational reforms and the way they affect a school s social structures Examining how testing policies affect children s opportunities to learn Chandra Muller and Kathryn Schiller find that policies which increased school accountability boosted student enrollment in math courses reflecting a shift in the school culture towards higher standards Employing a variety of analytical methods The Social Organization of Schooling provides a sound understanding of the social mechanisms at work in our educational system This important volume brings a fresh perspective to the many ongoing debates in education policy and is essential reading for anyone concerned with the future of America s children
