*Kondratieff waves* Brian J. L. Berry, Leonid E. Grinin, Andrey V. Korotayev, Philippe Jourdon, Lucas Bernard, Aleksandr V. Gevorkyan, Tom Palley, Willi Semmler, William R. Thompson, Arno Tausch, Denis J. Dean, Euel Elliott, Jonas Van Vossolle, Peter Herrmann, Stephen I. Ternyik, Leo Nefiodow, Simone Nefiodow, Anton L. Grinin, Valentina M. Bondarenko, Nikolai D. Kondratieff, Barry K. Gills, Robert A. Denemark, 2015-05-29 In the period from the 1920s to 1930s the theory of economic cycles underwent dramatic changes Due to the research of such famous economists as Nikolay Kondratieff Joseph Kitchin Wesley Mitchell Simon Kuznets and Joseph Schumpeter the idea of a whole system of economic cycles with characteristic periods between two and sixty years was developed The idea of a system of intertwined economic cycles is nowadays paramount to the school of evolutionary economics and its development promises rather interesting future outcomes That is why this issue of our Kondratieff Waves Yearbook is devoted to the interconnections between various economic cycles As to the subtitle of this volume one should note that many of the contributors refer to the system of cycles and the fact that real economic cycles make up a system whereas among different types of cycles the Juglar Kuznets and Kondratieff cycles are the most important ones for the present day economic dynamics Although Kondratieff himself considered long waves as above all an economic phenomenon the theory of the long waves became however very actively developed in connection with their political and geopolitical aspects In this Yearbook the political aspect of Kondratieff waves is the subject of several articles in the second section The last section of this Yearbook is devoted to the heritage of Kondratieff and other prominent economists The year 2015 marks the 150th anniversary of the outstanding Russian economist one of the most prominent researchers of

medium term economic cycles Mikhail Tugan Baranovsky and the volume is concluded with Kondratieff's article about him. Concerning 2015 we should mention another anniversary namely 30 years since the death of Simon Kuznets 1901-1985. This edition will be useful for economists, social scientists as well as for a wide range of those interested in the problems of the past, present and future of global economy and globalization.

**Disciplining Germany** Jaimey Fisher, 2007. A look at how the discussions, debates and controversies in Germany about youth and reeducation after World War II helped Germans come to terms with their Nazi past, negotiate Allied occupation and construct postwar German identity. During Hitler's reign the Nazis deliberately developed and exploited a youthful image and used youth to define their political and social hierarchies. After the war with Hitler gone but still requiring cultural exorcism, many intellectuals, authors and filmmakers turned to these images of youth to navigate and negotiate the most difficult questions of Germany's recent nefarious past. Focusing on youth education and crime allowed postwar Germans to claim one last realm of sovereignty against the Allies' own emphatic project of reeducation. Youth reeducation and reconstruction became important sites for the occupied to confront not only the recent past but to negotiate the present occupation and ultimately direct the future of the German nation. *Disciplining Germany* analyzes a variety of media including literature, news media, intellectual history and films in order to argue that youth and education played a central role in Germany's coming to terms with the Nazi past. Although there has been a recently renewed interest in Germany's coming to terms with the past, this attention has largely ignored the role of youth and reeducation. This lacuna is particularly perplexing given that the Allies' reeducation project became in many ways a cipher for the occupational project as a whole. *Disciplining Germany* opens up the discussion and points toward more general conclusions not only about youth and education as sites for wider socio-political and cultural debates but also about the complexities of occupation and the intertwining of different national cultures. In this investigation, the study attends to both high and low cultural text to specialized versus popular texts to examine how youth was mobilized across the generic spectrum. With these interdisciplinary approaches and timely interventions, *Disciplining Germany* will find a diverse readership including upper division and graduate courses in German studies and German history as well as those general readers interested in Nazi Germany, cultural history, film and literary studies, youth culture, American studies and post-conflict and occupational situations.

**The Limits of the Green Economy** Anneleen Kenis, Matthias Lievens, 2015-03-24. Projecting win-win situations, new economic opportunities, green growth and innovative partnerships, the green economy discourse has quickly gained centre stage in international environmental governance and policymaking. Its underlying message is attractive and optimistic: if the market can become the tool for tackling climate change and other major ecological crises, the fight against these crises can also be the royal road to solving the problems of the market. But how green is the green economy? And how social or democratic can it be? This book examines how the emergence of this new discourse has fundamentally modified the terms of the environmental debate. Interpreting the rise of green economy discourse as an attempt to reinvent capitalism, it

unravels the different dimensions of the green economy and its limits from pricing carbon to emissions trading from sustainable consumption to technological innovation The book uses the innovative concept of post politics to provide a critical perspective on the way green economy discourse represents nature and society and their interaction and forecloses the imagination of alternative socio ecological possibilities As a way of repoliticising the debate the book advocates the construction of new political faultlines based on the demands for climate justice and democratic commons This book will be of interest to students and scholars of environmental politics political ecology human geography human ecology political theory philosophy and political economy Includes a foreword written by Erik Swyngedouw Professor of Geography Manchester University      *Society at a Glance 2014 OECD Social Indicators* OECD,2014-03-18 The biennial OECD overview of social indicators      Reconfiguring Global Societies in the Pre-Vaccination Phase of the COVID-19 Pandemic Jack Fong,2024-05-01 Reconfiguring Global Societies in the Pre Vaccination Phase of the COVID 19 Pandemic examines lived experiences of the COVID 19 pandemic in communities and societies around the world before the arrival of vaccines This collection presents analyses of scholars from eight countries all of whom were engaged in the unfolding crisis of social forces across the world This timely volume conveys valuable insights about how public officials the state healthcare workers and ultimately citizens responded to consequences of the pandemic upon not only the body but also social relations in community city and society The contributing scholars document how state apparatuses urban configurations places of employment legal structures and ways of life responded to crisis altered social conditions during the pandemic The book investigates what societies experiencing crisis around the world reveal about the state s efficacy and inefficacy in fulfilling its social contract for its citizens especially on unresolved issues related to social relations based on politics race ethnicity gender and crime This collection brings together a cross section of scholars experiencing the same temporal moment of crisis together watching and observing how the pandemic of their age uncoiled itself into the fabric of community onto the institutions and bureaucracies of society and into the most intimate confines of the home
