anthologies have shifted from playing a relatively minor role in academic culture to a position of dominance. The essays in this collection explore the significant intellectual, economic, political, pedagogical, and creative resonance of anthologies through all levels of academic life. They show that anthologies have consequences and are grounded in commitments. Striving to articulate these consequences and commitments is a priority in higher education today. Most of the contributors to this volume are editors of anthologies and they draw on personal experiences to provide a rare glimpse into the economics and logic of anthology publication. Their essays illustrate the ways in which editing an anthology involves negotiation and compromise between intellectual ideal and realistic practice. *On Anthologies* includes discussion of a wide range of anthologies used and produced by teachers and scholars. Though the emphasis is on literature and theory, anthologies' insights in this volume speak to professionals in all areas of academic life. Collectively, these essays establish the foundation for continuing critical analysis of anthology production and consumption in all disciplines.

Participation, Marginalization and Welfare Services Aila-Leena Matthies,Lars Uggerhøj,2016-05-13 Current debates
around participation and marginalization dominate the agenda of many European political forums There is an increasing
concern about the stability of social cohesion and a growing number of particular groups of people who are regarded as
being at risk of being socially excluded or marginalized This volume goes beyond the surface of public discussions to look at
the central role played by welfare services in European societies in either strengthening or hindering participatory
citizenship and democracy In current discussions welfare services understood in a broad sense are centrally positioned there
are high expectations that welfare services can hinder marginalization and enable participation Yet marginalization is in most
cases rooted in the deeper structures of society with economy participation and involvement dependent on political or highly
personal factors which are beyond the scope of welfare services This groundbreaking volume posits that participation and
marginalization are twin concepts expressing opposing sides of one and the same processes faced by individuals and
communities It will be essential reading for social workers sociologists and policy makers throughout Europe
