Social stratification in Japan and the United States Christoph Kilian,2007-03-20 Seminar paper from the year 2004 in the subject Business economics Business Management Corporate Governance grade 2 3 Hamburg University of Applied Sciences course Kultur und Sozialwissenschaften language English abstract Social stratification implies that in every society goods and services are not equally distributed Some people are wealthy enough to buy a house others have to pay rent to live in a small apartment More generally spoken why are some people rich and others poor A society without social stratification implies that there are no inferior or superior positions and all human beings are equal and have the same prerequisites when they are born The opposite is the case People are born into families of unequal positions some are born into rich influential families others have to live under the poverty level Wouldn t it be fair for all human beings to have the same starting position when they are born In every country the reality looks different and that is a reason why social stratification is such an interesting topic To what extent have inequality and difference an impact on people s life Japan and the USA are both highly modernized and industrialized countries According to World Bank the USA has the biggest Gross National Product GNP in the world followed by Japan This fact underlines the importance of both nations for the world economy These figures get more interesting when they are put into relation with the population of each country The figure GNP per person is a measurement for the wealth of a country In this ranking the USA is in fourth place followed by Japan Albrecht et al 2003 These figures might give the impression that both countries are quite similar but there is one major difference Japan is the only non Western country that is industrialized The cultural background is different and that is a reason why a comparison between these countries can be interesting and might lead to surprising results In this paper I will try to find out what inequality is based on and why these differences occur of varying strength in both countries In these countries social stratification depends on cultural aspects as well as economical aspects The cultural background influences the way the society deals with economy After giving an introduction about basic definitions and concepts of social stratification I will describe and analyse differences in income and education in both societies To make a comparison useful and clear I will include data from the Fischer Weltalmanach and the Human Development Report 2002 to this term paper **The Routledge Handbook of Poverty in the United States** Stephen Haymes,Maria Vidal de Haymes,Reuben Miller,2014-12-17 In the United States the causes and even the meanings of poverty are disconnected from the causes and meanings of global poverty The Routledge Handbook of Poverty in the United States provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization Reorienting its national

economy towards a global logic US domestic policies have promoted a market based strategy of economic development and growth as the obvious solution to alleviating poverty affecting approaches to the problem discursively politically economically culturally and experientially However the handbook explores how rather than alleviating poverty it has instead exacerbated poverty and pre existing inequalities privatizing the services of social welfare and educational institutions transforming the state from a benevolent to a punitive state and criminalizing poor women racial and ethnic minorities and immigrants Key issues examined by the international selection of leading scholars in this volume include income distribution employment health hunger housing and urbanization With parts focusing on the lived experience of the poor social justice and human rights frameworks as opposed to welfare rights models and the role of helping professions such as social work health and education this comprehensive handbook is a vital reference for anyone working with those in poverty whether directly or at a macro level
