Social Workers And Their Practice In Welfare Bureaucracies

John Harris, Vicky White

Social Workers And Their Practice In Welfare Bureaucracies:

Social Workers and Their Practice in Welfare Bureaucracies David Howe, 1986 **The McDonaldization of Social Work** Donna Dustin, 2016-02-17 Based upon George Ritzer's McDonaldization of Society thesis and incorporating aspects of social theory this book examines the introduction of care management to social work practice Donna Dustin analyzes care management as an example of the managerial application of efficiency calculability predictability and control to social work practice These principles put to good use in organizations that produce tangible outputs at a profit are being increasingly applied in non profit public sector organizations where the outcomes require intangibles such as professional relationships The author examines whether the McDonaldization process heightens dilemmas such as cost versus rights for professionals working in the social services Using social theory to frame her research with care managers and their managers in the UK the author examines the day to day implications of care management for social work practice and questions whether the construction of service users as customers contributes to empowering practice The book's in depth analysis of the policy background implementation and practice of care management will resonate with social workers in other national contexts such as the US where the care management model has been introduced **Discretion in Welfare Bureaucracies** Majka Ryan, 2023-08-08 Through case study research Majka Ryan offers a systematic microanalysis of discretion in a specific context of residence based welfare conditionality derived from the labour movement directive 2004/38 EC The latter is utilised in the coordination of social security benefits for mobile EU citizens across Europe Ryan reveals that in Ireland and other jurisdictions official rights be they supranational or local when translated into practice are shaped by different political organisational and decision making actors consequently leading to an uneven distribution of substantive rights and unequal outcomes for different groups of people disproportionately affecting those who must prove their deservingness This book evidences how residence based welfare conditions create a context where power is exercised freely by street level decision makers and illustrates how that power affects different groups in society and consequently how through those practices the hegemonic discourses around legitimacy of access to public resources are reproduced The Compleat Social Worker David Howe, 2014-11-20 The role of the social worker is to be found lying interestingly between society and the individuals they work with As a result social workers often feel pulled between the demands and challenges that each presents The Compleat Social Worker explores the many debates the profession enjoys including those between nature and nurture care and control thought and feeling art and science facts and values In examining these ideas and the discussions they sponsor it celebrates social work's rich heritage of scientific thought and human relationships It is out of these many divisions and disagreements and their resolution that the idea of the well rounded compleat social worker emerges For those wishing to explore and enjoy argue and acknowledge what it is to be a good social worker this elegant book will prompt lively interest and debate **Managing State Social Work** John Harris, 2018-12-20 Published in 1998 The

industrial model of the labour process developed by Braverman was applied to social work in the radical social work literature. The book engages in a more critical examination of the application of the labour process perspective to social work with particular reference to front line management in a local authority context. It begins with a review of the labour process literature which demonstrates the extent to which the independence of Braverman's model on scientific management was undermined in the post Braverman debate. The radical texts' orthodox Bravermanian approach to the social work labour process is considered. In those texts the social work labour process is represented as having moved towards an industrial model which steadily encroached on the autonomy of front line field social workers through managers' wresting of control over their work. The book advances an alternative model of the social work labour process which takes account of the distinctive features of social work as a state mediated bureau professional labour process. Findings from a small scale case study of a social services department are presented. Data from the study are used to test the bureau professional model of the social work labour process against the orthodox Bravermanian model. Developments in the social services department's organizational structure are set out and the position of front line managers is considered through an exploration of their identifications and commitments in relation to management and trade unionism. The data from their accounts support the bureau professional model of the labour process and the position of front line managers emerges as more ambiguous than the radical social work literature indicated. Front line managers did not share global goals with senior management nor were their interests merged straightforwardly with those of social workers.

The Politics of Social Work Fred W

Powell, 2001-03-28 Fred Powell argues for social work as civic engagement promoting inclusion and justice through dialogue and trust. His book is an impressive combination of deep scholarship and fresh up to date analysis of current issues. Bill Jordan, University of Exeter. An illuminating discussion of the influence of postmodern trends on the practice of social work that also offers a bracing guide for the future of the profession. Social work practice, Powell argues, needs to be anchored in a commitment to an inclusive idea of citizenship and especially the inclusion of the most vulnerable citizens. Francis Fox Piven, City University of New York. This is an extraordinarily useful book for studies of social policy especially in its presentation of a condensed history of social work's relationship to social policy. The book is well documented, well written and challenging. It stimulates more thought than is common in professional literature. International Social Work. The Politics of Social Work provides a major contribution to debates on the politics of social work at the beginning of the 21st Century. It locates social work within wider political and theoretical debates and deals with important issues currently facing social workers and the organisations in which they work. By setting the current crisis of identity social workers are experiencing in international context, Fred Powell analyses the choices facing social work in postmodern society. Fred Powell explores in this text contemporary and historical paradigms of social work from its Victorian origins to the development of reformist practice in the welfare state to radical social work responses to social exclusion, the renaissance of civil society, multiculturalism.

feminism and anti oppressive practice In conclusion the he examines the options facing social work in the 21st century and argues for a civic model of social work based on the pursuit of social justice in an inclusive society The Politics of Social Work will be essential reading for students on qualifying and post qualifying social work courses as well as courses in sociology social policy social administration and politics

The Challenge of Existential Social Work Practice Mark Griffiths,2017-08-29 Social work is being constantly shaped by external forces such as new information technology managerialism increased public accountability and programme risk management Although an appreciation of how these forces impact on direct service is required an exclusive focus on them can prevent social workers from genuinely embracing current practice opportunities Existentialism a philosophy that emphasises our existence in the world as free and responsible agents helping to shape our own experiences through the choices we make has influenced the development of social work almost from its origins This ground breaking text highlights social work s existential heritage and the existential threats and challenges to current social work practice and explores how existential philosophy can help direct service social workers find purpose and meaning in their daily practice in a radically uncertain and alienated twenty first century world This is a fascinating read from one of the leading scholars in existentialist social work and an essential guide for today s student and practitioner in the application of existential social work practice

Social Work: The Social Organisation of an Invisible Trade Andrew Pithouse,2019-05-23 First published in 1998 this book sets out to shed sociological light upon the much under researched realm of day to day child care practice The text broke new ground when first published in 1987 and there have been few if any similar books that adopt an ethnographic approach to statutory child care practice A second edition would still speak to this rarely analysed occupational world However it would enjoy greater resonance when up dated with practitioner viewpoints on the extent to which the findings remain pertinent today which is

likely to be the case The book offers no conclusions other than it demonstrates that the invisible world of practice cannot be readily understood or changed unless grasped through an interactionist sociology The book is aimed at a social work social welfare market as well as a sociology of profession organization readership **A History of the Roles and**
