Socialism in Southern Asia Saul Rose, 1959

History Of The International: World Socialism 1943-1968 Julius

Braunthal, 2019-03-20 With this volume the history of the first century of the International reaches its conclusion Originally I had intended that the trilogy would come to a close with the centenary of the founding of the First International in September 1964 But before I could finish writing the third volume the tragedy of the Communist revolution in Czechoslovakia had played itself out The Spring of Prague of 1968 having set in motion a process of change from a Communist dictatorship to a Socialist democracy was followed within a few months by the invasion of the armies of the five Warsaw Pact powers to forestall reformation in Czechoslovakia Both revolution and counter revolution were events of the utmost significance for the history of Socialism the revolution for showing that it was possible for a Communist system of totalitarian dictatorship to be transformed without resort to force and the counter revolution for showing how the regime in the Soviet Union has remained essentially unaltered since Stalin's death The invasion of Czechoslovakia brutally called in question any optimistic perspective of development within the Soviet Union itself *The Cambridge History of Socialism: Volume 2* Marcel van der Linden, 2022-11-24 This volume describes the various movements and parties across all six continents that wanted social change through state transformation It begins with a reconstruction of social democracy's trajectories from the 1870s until the present The evolution of socialism on different continents is illustrated through a number of national case studies Experiments at a subnational level for example municipal socialism are also explored as are the varying experiences of international umbrella organizations The next part focuses on divergent socialist experiments and ideologies in several parts of the world including South Asia Africa the Arab world Brazil Venezuela and Israel Palestine followed by an overview of independent socialist movements including left socialist parties of the 1930s and the post war period and the global New Left since its beginnings in the 1950s The volume concludes with critical essays on socialism's long term and global development
