Edición Abreviada. Sociedad. T-II Manuel Ordorica, Jean-François Prud'homme, 2012 Serie de cuatro volúmenes que condensan la colección de dieciséis tomos que fue publicada en 2010 bajo el título de Los grandes problemas de México con motivo de las conmemoraciones del bicentenario de la Independencia del centenario de la Revolución y de los setenta años de El Colegio de México Cada capítulo reproduce una estructura que contiene un diagnóstico un pronóstico cuando es posible y propuestas de acción en torno a problemas específicos El presente volumen trata los principales problemas de carácter social en México Desigualdad social Movimientos sociales Educación Relaciones de género y Culturas e identidades La ciudadanía y el medio ambiente en México, 2020-07-27 Esta obra colectiva representa una contribución empírica al concepto de ciudadanía En ella se presenta una reflexión teórica y crítica sobre los límites ideales de la categoría jurídica además de un análisis que se deriva de estudios de caso que revelan la existencia de una inadecuada comprensión del ciudadano en la legislación y las instituciones actuales Se explica que el individuo suele definirse por dichas figuras jurídicas como un elemento externo al entorno ecológico sin acertar que la ciudadanía se explica por su vínculo con la comunidad y su relación de comprensión cuidado de territorios de vida y de uso Por tanto se hace necesario repensar la categoría misma del engañado y autoengañado del lenguaje y llevarla a un escenario funcional que refleje el contexto en que vivimos Ante eso se propone que la ciudadanía sea repensada como un devenir político que coevoluciona con las relaciones socioecológicas complejas y dinámicas del entorno Se considera que independientemente de su definición intrincada es un instrumento

Wolfe, 2017-06-22 In *Watering the Revolution* Mikael D Wolfe transforms our understanding of Mexican agrarian reform through an environmental and technological history of water management in the emblematic Laguna region Drawing on extensive archival research in Mexico and the United States Wolfe shows how during the long Mexican Revolution 1910 1940 engineers distribution of

water paradoxically undermined land distribution. In so doing, he highlights the intrinsic tension engineers faced between the urgent need for water conservation and the imperative for development during the contentious modernization of the Laguna's existing flood irrigation method into one regulated by high dams, concrete-lined canals, and motorized groundwater pumps. This tension generally resolved in favor of development, which unintentionally diminished and contaminated the water supply while deepening existing rural social inequalities by dividing people into water haves and have-nots regardless of their access to land. By uncovering the varied motivations behind the Mexican government's decision to use invasive and damaging technologies despite knowing they were ecologically unsustainable, Wolfe tells a cautionary tale of the long-term consequences of short-sighted development policies.
