

Society Nature

Philippe Descola, Gisli Palsson

Society Nature:

Society and Nature Hans Kelsen, 2009 The influential jurist Hans Kelsen 1881 1973 here applies his concept of the distinction between society and nature He shows how primitive man developed his interpretation of nature through the laws of retribution and of causality to a modern concept of nature and society He holds that the gradual emancipation of the law of causality from the principle of retribution is the emancipation from a social interpretation of nature The process shows a relation between social and natural science which is very important from the point of view of intellectual history Introduction p viii Extensively annotated Kelsen is known for his theory of pure positive law as postulated in *General Theory of Law and State* which is also available in a reprint edition from The Lawbook Exchange

Society and Nature Peter Dickens, 1992 In this wide ranging effort to theorize about the relationships between society and nature Peter Dickens attempts to reconstruct social theory in a way that enables it to speak to contemporary environmental issues After reviewing existing sociological traditions he draws on the early work of Karl Marx to suggest that processes and relations in the workplace are the main source of people's separation from nature In addition people's understanding of nature tends to mirror their experience of the social world Redefining the work of Anthony Giddens in an ecological direction Dickens analyzes developments in biological thinking that seem consistent with this approach He considers the role of culture and he critiques the contemporary deep green and deep ecology movements Focusing on the alienation of human beings from the natural world and the place of nature in their deep mental structures the author works in part from a Marxist perspective but draws a wide variety of social psychological and biological theories into the discussion *Society and Nature* not only addresses a central debate in contemporary social science regarding this interrelationship but also responds to the intellectual challenge presented by natural scientific concepts of environmental problems that oversimplify or ignore their political or social relational dimensions Author note Peter Dickens is Senior Lecturer in Urban Studies and Social Policy at the University of Sussex UK and the author of *Urban Sociology Society Locality and Human Nature*

[Nature and Society in Historical Context](#) Mikulas Teich, Roy Porter, Bo Gustafsson, 1997-02-13 A collection of essays describing the historical connection between nature and society

Society and Exploitation Through Nature Martin Phillips, Tim Mighall, 2014-06-06 *Society and Exploitation Through Nature* offers an integrated approach to the environment linking the philosophical social and physical sciences to environmental problems and issues The text covers three main themes exploitation of nature and society the limits of exploitation through sustainability and managing environmental problems These themes are illustrated throughout the book with global case studies

Nature, Society, and Justice in the Anthropocene Alfred Hornborg, Alf Hornborg, 2019-06-27 Money and market prices obscure an unequal global exchange of resources which is a prerequisite to what we perceive as technological progress

Nature, Environment and Society Philip Sutton, 2017-03-14 How have sociologists responded to the emergence of environmentalism What has sociology to offer the study of environmental

problems This uniquely comprehensive guide traces the origins and development of environmental movements and environmental issues providing a critical review of the most significant debates in the new field of environmental sociology It covers environmental ideas environmental movements social constructionism critical realism ecocentric theory environmental identities risk society theory sustainable development Green consumerism ecological modernization and debates around modernity and post modernity Philip Sutton adopts a long term view which focuses on the relationship between ideas of nature and environment ecological identities and social change providing a framework for future research Bringing environmental issues into contact with sociological theories Nature Environment and Society provides an up to date introduction to this important new field It will be essential reading for all students of sociology environmental studies and anyone interested in understanding environmental problems **Justice, Society and Nature** Brendan

Gleeson, Nicholas Low, 2002-09-11 Justice Society and Nature examines the moral response which the world must make to the ecological crisis if there is to be real change in the global society and economy to favour ecological integrity From its base in the idea of the self through principles of political justice to the justice of global institutions the authors trace the layered structure of the philosophy of justice as it applies to environmental and ecological issues Philosophical ideas are treated in a straightforward and easily understandable way with reference to practical examples Moving straight to the heart of pressing international and national concerns the authors explore the issues of environment and development fair treatment of humans and non humans and the justice of the social and economic systems which affect the health and safety of the peoples of the world Current grass roots concerns such as the environmental justice movement in the USA and the ethics of the international regulation of development are examined in depth The authors take debates beyond mere complaint about the injustice of the world economy and suggest what should now be done to do justice to nature Education, Nature, and Society

Stephen Gough, 2014-11-20 Environmental issues continue to divide opinion sometimes in extreme ways Almost everyone agrees that education has a role to play in ensuring the future of humanity on Earth Some think we should all learn to leave a minimal environmental footprint others argue that education should promote economic growth because only growth can generate the capital needed to develop solutions to environmental problems Advocates on each side often find the views of their opponents simply incredible giving rise to accusations of bad faith or poor science This book explores the foundations of the debate by examining human interrelations with Nature It takes an educational perspective but also draws on evidence from anthropology economics ecology policy sciences and natural history The case presented is that any coherent view of the purposes and potential of education requires a theory of human society in the natural world For such a theory education and more broadly learning must be more than an instrument for the achievement of personal or policy goals Rather it is an integral continuing and necessary component of personal and policy development On this basis a novel approach to curriculum design and implementation is outlined Risk Society Ulrich Beck, 1992-09-03 An analysis of the

condition of Western societies that will take its place as a core text of contemporary sociology alongside earlier typifications of society as postindustrial and current debates about the social dimensions of the postmodern Bulletin of the Boston Society of Natural History Boston Society of Natural History,1929 **Proceedings of the Boston Society of Natural History** Boston Society of Natural History,1925 **Journal of the East Africa and Uganda Natural History Society** East Africa and Uganda Natural History Society,1910 **Bulletin of the Natural History Society of New Brunswick** Natural History Society of New Brunswick,1907 Nature and Society Philippe Descola,Gisli Palsson,2003-12-16 The contributors to this book focus on the relationship between nature and society from a variety of theoretical and ethnographic perspectives Their work draws upon recent developments in social theory biology ethnobiology epistemology sociology of science and a wide array of ethnographic case studies from Amazonia the Solomon Islands Malaysia the Mollucan Islands rural communities from Japan and north west Europe urban Greece and laboratories of molecular biology and high energy physics The discussion is divided into three parts emphasising the problems posed by the nature culture dualism some misguided attempts to respond to these problems and potential avenues out of the current dilemmas of ecological discourse

Culture: A Drama of Nature and Person Piotr Jaroszyński,2023-12-11 This monograph represents a rare classical philosophical approach to culture It is grounded in philosophical realism and emphasizes personalism as a true achievement of philosophical anthropology Employing the apparatus of the history of philosophy science and religion the author demonstrates the immense scope of the drama unfolding within human culture In a classical approach evaluation is inevitable with regard to various theories of culture human culture as such and all its main actors Jaroszy ski s work shows that realistic study of what it means to be a human person leads to the most comprehensive understanding of culture as it is and should be Proceedings of the Somersetshire Archaeological and Natural History Society Somersetshire Archaeological and Natural History Society,1876 *Proceedings of the Bournemouth Natural Science Society* ,1909

Creation and Ecology Ronald A. Simkins,2020-12-24 In this book Ronald A Simkins addresses the current environmental crisis and what the Bible might contribute in response to it The environmental crisis includes loss of biodiversity degradation of the soil and especially climate change If left unchecked these trends will bring about the collapse of human civilization These environmental problems are interrelated and share a similar cause the exploitation of the natural world through an economy structured by capitalist relations of production and powered by the burning of fossil fuels Through our economic relations we have depleted natural resources polluted natural environments and altered natural processes These problems are a product of our political economy which entails not only our politics ideology and religion but primarily our economic system Because the crisis is economic at its core Simkins first sets the Bible within its own economic context exploring how the biblical ideas of creation an understanding of the human relationship to the natural world were the product of the ancient Israelite political economy Then Simkins places the biblical tradition in conversation with the current environmental crisis

The result is a far richer view of creation in the biblical tradition and a better understanding of what is at stake in the current environmental crisis *Journal of the Bath and West and Southern Counties Society* Bath and West and Southern Counties Society,1908 **Being a Planner in Society** Nicholas Low,2020-08-28 This timely book addresses what it is to be a planner in a changing world a world in need of transformation in the way planning is done in order to tackle social problems and ecological crises Nicholas Low argues for the need to revalue public planning sensitive to the social context in which it takes place
