Sociological Beginnings The First Conference Of The German Society For Sociology:

Sociological Beginnings Christopher Adair-Totef, 2006-01-01 This is a translated edition of five of the nine papers and the responses presented at the first conference of the Deutsche Gesellschaft für Soziologie DGS that was held in 1910 These are seminal contributions by some of the founders of classical German sociology and social theory including Max Weber Georg Simmel Ferdinand Tönnies Ernst Troeltsch and Werner Sombart A substantial introduction discusses the lives and works of the five thinkers placing them in the context of Germany in the early twentieth century and discussing their personal and societal connections The papers none of which has ever appeared in English are a remarkable testament to the developing thought of key scholars The year 1910 was a defining year for German sociology There were still no sociology schools departments or even professorships but a significant number of important thinkers had published crucial sociological works Through such publications Ferdinand Tönnies Georg Simmel Max Weber Werner Sombart and Ernst Troeltsch had founded considerable reputations and by 1909 the first three had banded together with other scholars to form the DGS The papers show German sociology at a decisive moment when these thinkers were at their prime and were engaged in building a new society devoted to investigation of social reality based upon sound scholarly principles and free from biased social dogmatics The topics continue to have relevance and the exchanges provide a lively dimension one that is not found simply by reading the books of these five founders of sociological thinking

The Decline of Established Christianity in the Western World Paul Silas Peterson, 2017-09-22. While Church attendance in the West is often cited as being in decline, it is argued that this applies primarily to the older established forms of Christianity. Other expressions of the faith are in fact stable or even growing. This volume provides multidisciplinary interpretations of and responses to one of the most complicated and controversial issues regarding the global transformation of Christianity today: the decline of established Christianity in the Western world. It also addresses the future of Christianity in the West after the decline. Drawing upon historical research, sociology, religious studies, philosophy, and theology, an international panel of contributors provide new theoretical frameworks for understanding this decline and offer creative suggestions for responding to it. Established Christianity is conceptualized as historically, culturally, socially, and politically embedded religion with or without official established status. This is a dynamic volume that gives fresh perspective on one of the great social changes taking place in the West today. As such, it will be of great interest to scholars of religious sociology, history, and anthropology, as well as theologians.

Intellectual Work and the Spirit of Capitalism Thomas Kempe, 2014-05-29. Elasticized Ecclesiology Ulrich Schmiedel, 2017-01-17 This study confronts the current crisis of churches In critical and creative conversation with the German theologian Ernst Troeltsch 1865 1923 Ulrich Schmiedel argues that churches need to be elasticized in order to engage the other Examining contested concepts of religiosity community and identity Schmiedel explores how the closure of church against the sociological other corresponds to the closure of church against the theological other Taking trust as a central category he advocates for a turn in the interpretation of Christianity from propositional possession to performative project so that the identity of Christianity is done rather than described Through explorations of classical and contemporary scholarship in philosophy sociology and theology Schmiedel retrieves Troeltsch's interdisciplinary thinking for use in relation to the controversies that encircle the construction of community today The study opens up innovative and instructive approaches to the investigation of the practices of Christianity past and present Eventually church emerges as a work in movement continually constituted through encounters with the sociological and the theological other
