

INTRODUCTION TO SOCIOLOGY NOTES

UNIT 1: Foundations of Sociology

Sociological imagination^{*} is closely related to the sociological perspective: the way in which sociologists look at, and try to find meaning in, the world around them. A central dictum of this perspective, espoused by Peter Berger (1963).

C. Wright Mills, who coined the term the **sociological imagination**^{*} in 1955, defined it as "the vivid awareness of the relationship between personal experience and the wider society." Mills argues that sociological imagination involves changing one's perspective and requires "the capacity to range from the most impersonal and remote transformations to the intimate features of the human self—and to see the relations between the two" (Mills, 1955).

To **conduct research** on these topics, sociologists follow a rigorous process. First, they formulate a question that is narrow enough to be answered by evidence. Second, they conduct background research to find out what other sociologists have discovered about the question. Third, they construct a hypothesis that states the researcher's idea about the topic. Fourth, they gather and analyze evidence in order to determine if the hypothesis is correct. Fifth, they report the results, usually by publishing an article or book.

Sociology^{*} can best be summed up as the systematic study of social life and human society. The sociological perspective looks for the "general in the particular" (Berger, 1963).

Émile Durkheim was one of the first sociologists to specify what exactly is "social" about our individual actions and decisions.

Sociologists see the "general" in the "particular."

Social facts are ways of thinking and behaving which are external to us and constrain us as individuals.

The **sociological imagination** is recognition of how social forces shape individual behavior.

The term "**sociology**" was first used by **Auguste Comte** when he proposed a science that would unite everything we know about human beings.

Sociology was born with the **Industrial Revolution**. In the 19th centuries, things were changing rapidly; people were flocking to the cities, cities were growing exponentially, there was a lot of overcrowding, there was no indoor plumbing.

Auguste Comte (PD). Considered the founder of sociology as a method of study, Auguste Comte (1798–1857), was different than his philosophical predecessors, such as Confucius and Plato.

Positivism asserts that humans must understand the world around them by using observable facts derived from direct experiences with the senses.

Emerging Stronger Jeffrey Chin,Michele Lee Kozimor,2023-08-31 Responding to the sudden and far reaching implications of the COVID 19 pandemic in

college classrooms and on campus Emerging Stronger assembles an original compilation of chapters that revisit, reframe and refine the practice of teaching in a fundamentally altered landscape. Cultivated from a wide array of different fields from sociology and political science to literature and secondary education, expert contributors to this volume extend their scholarship on teaching and learning and offer thoughtful pieces about curricular innovation, teaching tools and techniques and evidence-based approaches that will interest dedicated faculty in any discipline. The chapters fall into three categories: Modalities of Teaching and Learning, Pedagogical Strategies, and Student Engagement, each of which carries an all-important focus on what readers should know about best practices now and for the foreseeable future. Whether experienced faculty scholars just starting out in their teaching careers or aspiring graduate students, readers of this volume will come away with great techniques and strategies but also community hope and opportunity to strengthen their teaching and provide better learning environments in their classrooms.

Threshold Concepts on the Edge Julie A. Timmermans, Ray Land, 2019-12-30
Since the first literature about the Threshold Concepts Framework was published in 2003, a considerable body of educational research into this topic has grown internationally across a wide range of disciplines and professional fields. Successful negotiation of a threshold concept can be seen as crossing boundaries into new conceptual space or as a portal opening up new and previously inaccessible ways of thinking about something. In this unfamiliar conceptual terrain, fresh insights and perceptions come into view and access is gained to new discourses. This frequently entails encounters with troublesome knowledge, knowledge which provokes a liminal phase of transition in which new understandings must be integrated and importantly, prior conceptions relinquished. There is often double trouble in that letting go of a prevailing familiar view frequently involves a discomfiting change in the subjectivity of the learner. We become what we know. It is a space in which the learner might become stuck. *Threshold Concepts on the Edge*, the fifth volume in a series on this subject, discusses the new directions of this research. Its six sections address issues that arise in relation to theoretical development, liminal space, ontological transformations, curriculum, interdisciplinarity, and aspects of writing across learning thresholds.
