The purpose of this book is to explore new developments in the field of economic sociology It contains cutting edge theoretical discussions by some of the world's leading economic sociologists with chapters on topics such as the economic convention relational sociology economic identity economy and law economic networks and institutions The book is distinctive in a number of ways First it focuses on theoretical contributions by pulling together and extending what the contributors believe to be the most important theoretical innovations within their own particular areas of the field Second there are contributions by leading economic sociologists from both the US and Europe which gives the book both wider scope and appeal while also creating the opportunity for some interesting dialogue between distinct theoretical traditions The book will be of interest to researchers Ph D students and advanced students on both side of the Atlantic and indispensable in advanced economic sociology courses Functions, Data, and Models Sheldon P. Gordon, Florence S.

Gordon, 2025-02-24 This is a college algebra level textbook written to provide the kind of mathematical knowledge and experiences that students will need for courses in other fields such as biology chemistry business finance economics and other areas that are heavily dependent on data either from laboratory experiments or from other studies The focus is on the fundamental mathematical concepts and the realistic problem solving via mathematical modeling rather than the development of algebraic skills that might be needed in calculus Functions Data and Models presents college algebra in a way that differs from almost all college algebra books available today Rather than going over material covered in high school courses the Gordons teach something new Students are given an introduction to data analysis and mathematical modeling presented at a level that students with limited algebraic skills can understand The book contains a rich set of exercises many of which use real data Also included are thought experiments or what if questions that are meant to stretch the student's mathematical thinking Our Social World Jeanne H.
