Enns, George McGuire, 2012-12-06. Science demands that all theory must be checked by experiment. Richard Feynman, Nobel Laureate in physics 1965, reminds us in a wonderful quote that "The test of all knowledge is experiment. Experiment is the sole judge of scientific truth." 1. It is because nonlinear physics can be so profoundly counter-intuitive that these laboratory investigations are so important. This manual is designed to be used with the text *Nonlinear Physics with Maple for Scientists and Engineers*. Understanding is enhanced when experiments are used to check so please attempt as many of the activities as you can. As you perform theory these activities we hope that you will be amazed and startled by strange behavior, intrigued and terrorized by new ideas and be able to amaze your friends as you relate your strange sightings. Remember that imagination is just as important as knowledge so exercise yours whenever possible. But please be careful as nonlinear activities can be addictive, can provide fond memories and can awaken an interest that lasts a lifetime. Although it has been said that a rose by any other name is still a rose, with apologies to Shakespeare the

authors of this laboratory manual have in an endeavor to encourage the use of these nonlinear investigations called them experimental activities rather than experiments A number of design innovations have been introduced A     Subject Guide to Books in Print ,1993     **Scientific and Technical Books in Print** ,1972     *Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
