

Why Didn't Somebody Tell Me the Truth?

Vicki Thorn

As the foundress of Project Rachel, I have listened for years to the pain shared by women that was caused by sexual decisions. As I speak with women about healthy sexual choices, they have repeatedly said to me "why didn't someone tell me?" This question has haunted me over the years and lead me to do research on how people make sexual decisions and the biochemistry of sex.

I am amazed at what I have discovered. I am appalled at how little women and men know about how sex really works in our bodies. As a woman I am angry that we have not been told the truth, and have in fact been lied to by the proponents of sexual freedom and free love.

As I have presented this information to high school and college students, as a talk called, "What They Didn't Tell You in Sex Ed" I find that these young people are fascinated with the information and conclude on their own that sex probably belongs in marriage because it is far more complicated than anyone has told them.

'I Didn't Know That'

When I present this material to older, more mature women, they mumble throughout the talk and keep repeating, "I didn't know that. I didn't know that!" Young adults listen carefully and sometimes respond as one young woman did, "where were you seven years ago when I needed you?"

IN BRIEF

- * I didn't know that***
- * Continuation of the species***
- * Biochemical 'love'***
- * Complicated biological process***
- * Cohabiting risks***
- * Cancer risks***

Let me warn you that the article you are about to read is politically incorrect. Having said that, let me say that not only do I believe that this information has far-reaching potential to help couples make better partner choices for marriage, but it leads them naturally to Natural Family Planning. Additionally, this material is the biological component of the theology of the body.

The society we live in has promoted the lie that sex is without consequence; that it is a little like brushing your teeth. The message that is drummed into us is "if it feels good, do it." Teaching kids sex ed in mixed settings begins to break down their natural modesty very early.

Many programs boldly teach contraception and give the message that sex is something we simply can't control. Others present an abstinence curriculum and then subtly sneak in a condom message and even give demonstrations. They imply that condoms are safe and really do protect against HIV, other sexually transmitted diseases and pregnancy. Kids and teens are not really taught about how strong the drive to procreate is and how our bodies respond to that.

Let me start with a little biology refresher. A woman's cycle is composed of three phases. Immediately following her period is the follicular phase, when the body is preparing to ovulate. For pregnancy to occur, sex needs to occur one to five days before ovulation. As the woman gets close to ovulation, her body gives off signals about the impending event. There are pheromone changes.

(Pheromones are scent molecules that are not perceived by the normal olfactory cells but by different cells at the base of the interior nose called a VNO. Some people are incapable of detecting these molecules and are said to have anosia. We are all familiar with the pheromones in moths and other creatures, but most of us don't realize that they are at work in human attraction as well. I'll say more about that later.)

When a woman is getting close to ovulation she gives off pheromones that males detect. These pheromones cause testosterone surges in the male, making him more sexually interested and aggressive.

The female during this time also dresses a little more suggestively and behaves in a more flirtatious fashion. Her biology is exerting itself and trying to attract a male to achieve continuation of the species.

Sex is six times more likely to happen during this phase. Twenty percent of couples will get pregnant in the first month of having sex and 50 percent within the first six months. Pregnancies do happen the first time someone has sex because, quite likely, she is in her ovulatory phase. Nature wants to keep the species reproducing.

Also sexual arousal during this time will condition her body. Researchers showed women in this phase an erotic movie and found the women had an erotic response. They showed the same movie to women in other phases of their cycle and discovered that nothing happened.

As a follow up they showed the same movie to the women who had had the erotic response during another phase of their cycle and discovered that the erotic response had been conditioned by the one viewing of the movie.

Anthropologist Sarah Hody believes that this is why women become "hooked" on bad partners. They shared sex while she was vulnerable to being sexually conditioned and now she stays with this partner. In talking to teens and young adults about this, I tell them that mid-cycle

Houston rap with new photographs and album art that reveal the evolution of the scene from the 1970s to today's hip hop generation. The interviews range from the specifics of making music to the passions, regrets, memories, and hopes that give it life. While offering a view from some of Houston's most marginalized areas, these intimate conversations lay out universal struggles and feelings. As Willie D of Geto Boys writes in the foreword, *Houston Rap Tapes* flows more like a bunch of fellows who haven't seen each other for ages hanging out on the block reminiscing rather than a calculated literary guide to Houston's history.
