Knoblock,2014-01-23 This work offers a new and comprehensive account of the fastest and most beautiful sailing ships ever built It explores the quest for speed on the seas from the early 1800s through the fast paced times of the 1850s spurred on by the California Gold Rush of 1849 Not only are the career details of such noted ships as the Flying Cloud and Challenge discussed in detail but they are also put in context with the times in which they operated Their builders in East Coast states from Maine to Florida are discussed in detail as are the men and a woman in one instance who commanded and manned these ships The book documents the roles that owners and shipping agents played what kinds of cargo the ships carried worldwide and the

unusual trades in which they participated     *Eugene O'Neill* Harold Bloom, 2007 A collection of essays about the works of Eugene O'Neill     The Ship Model Builder's Assistant Charles Gerard Davis, 1926     Bridging the Seas Larrie D. Ferreiro, 2020-01-21 How the introduction of steam iron and steel required new rules and new ways of thinking for the design and building of ships In the 1800s shipbuilding moved from sail and wood to steam iron and steel The competitive pressure to achieve more predictable ocean transportation drove the industrialization of shipbuilding as shipowners demanded ships that enabled tighter scheduling improved performance and safe delivery of cargoes In *Bridging the Seas* naval historian Larrie Ferreiro describes this transformation of shipbuilding portraying the rise of a professionalized naval architecture as an integral part of the Industrial Age Picking up where his earlier book *Ships and Science* left off Ferreiro explains that the introduction of steam iron and steel required new rules and new ways of thinking for designing and building ships The characteristics of performance had to be first measured then theorized Ship theory led to the development of quantifiable standards that would ensure the safety and quality required by industry and governments and this in turn led to the professionalization of naval architecture as an engineering discipline Ferreiro describes among other things the technologies that allowed greater predictability in ship performance theoretical developments in naval architecture regarding motion speed and power propellers maneuvering and structural design the integration of theory into ship design and construction and the emergence of a laboratory infrastructure for research
