A Short History of Disruptive Journalism Technologies Will Mari, 2019-02-07 A Short History of Disruptive Journalism Technologies provides a swift analysis of the computerization of the newsroom from the mid 1960s

through to the early 1990s It focuses on how word processing and a number of related affordances including mobile reporting tools impacted the daily work routines of American news workers The narrative opens with the development of mainframes and their attendant use as databases in large daily newspapers It moves on to the minicomputer era and explores initial news worker experiences with computers for editing and publication Following this the book examines the microprocessor era and the rise of smart terminals microcomputers and off the shelf hardware software along with the increasing use of computers in smaller news organizations Mari then turns to the use of pre internet networks wire services and bulletin boards deployed for user interaction He looks at the integration of decentralized computer networks in newsrooms with a mix of content management systems and PCs and the increasing use of pagers and cellphones for news gathering including the shift from portable to mobile conceptualizations for these technologies A Short History of Disruptive Journalism Technologies is an illuminating survey for students and instructors of journalism studies It represents an important acknowledgement of the impact of pre internet technological disruptions which led to the even more disruptive internet and related computing technologies in the latter 1990s and through the present Annals of Natural History ,1839
