through the fifteenth centuries that are central to an understanding of memory and memory technique These sources are

interest in memory mnemonics and the synergy of text and image The art of memory was most importantly associated in the  
Middle Ages with composition and those who practiced the craft used it to make new prayers sermons pictures and music  
The mixing of visual and verbal media was commonplace throughout medieval cultures pictures contained visual puns words  
were often verbal paintings and both were used equally as tools for making thoughts The ability to create pictures in one s  
own mind was essential to medieval cognitive technique and imagination and the intensely pictorial and affective qualities of
