Brothers David Talbot, 2008-09-04 Robert F Kennedy was the first conspiracy theorist about his brother's murder In this astonishingly compelling and convincing new account of the Kennedy years acclaimed journalist David Talbot tells in a riveting superbly researched narrative why even on 22 November 1963 RFK had reason to believe that dark forces were at work in Dallas and reveals for the first time that he planned to open an investigation into the assassination had he become president in 1968 BROTHERS also portrays a JFK administration more besieged by internal enemies than has previously been realised from within the Pentagon the CIA the FBI and the mafia This frightening portrait of sinister elements within and without the government serves as the background for the emotionally charged journey of Robert Kennedy Reading it you can absolutely believe any number of people would have been happy for both brothers to meet a sticky end The tragedy not just for America but for the world is that since their murders no one has had the nerve to stand against the dark forces they challenged in quite the same way

Toxic Truth Lydia Denworth, 2018-07-19 They didn't start out as environmental warriors Clair Patterson was a

geochemist focused on determining the age of the Earth Herbert Needleman was a pediatrician treating inner city children But in the chemistry lab and the hospital ward they met a common enemy lead It was literally everywhere in gasoline and paint of course but also in water pipes and food cans toothpaste tubes and toys ceramics and cosmetics jewelry and batteries Though few people worried about it at the time lead was also toxic In Toxic Truth journalist Lydia Denworth tells the little known stories of these two men who were among the first to question the wisdom of filling the world with such a harmful metal Denworth follows them from the ice and snow of Antarctica to the schoolyards of Philadelphia and Boston as they uncovered the enormity of the problem and demonstrated the irreparable harm lead was doing to children In heated conferences and courtrooms the halls of Congress and at the Environmental Protection Agency the scientist and doctor were forced to defend their careers and reputations in the face of incredible industry opposition It took courage passion and determination to prevail against entrenched corporate interests and politicized government bureaucracies But Patterson Needleman and their allies did finally get the lead out since it was removed from gasoline paint and food cans in the 1970s the level of lead in Americans bodies has dropped 90 percent Their success offers a lesson in the dangers of putting economic priorities over public health and a reminder of the way science and individuals can change the world The fundamental questions raised by this battle what constitutes disease how to measure scientific independence and how to quantify acceptable risk echo in every environmental issue of today from the plastic used to make water bottles to greenhouse gas emissions And the most basic question how much do we need to know about what we put in our environment is perhaps more relevant today than it has ever been

interviews with practitioners and critics of public journalism is interspersed throughout the text At the end of each essay a series of quotes from a wide variety of sources In other words augments each chapter with ideas and insights that support and contradict the points used by each chapter author
