*A Book of Great Worth* Dave Margoshes,2012-04-01 Set largely among the Jewish community of inter war New York City this is a beautifully told collection of scenes from Morgenstern s life The tricky ground of writing the advice column for a provincial Yiddish daily successes during and hard

times after the Depression a position at the top of his craft as a labour specialist in the New York City Yiddish press these and many more form a portrait of a fundamentally decent man in morally perplexing situations I've been working on a series of stories about the character I call my father loosely based on my own father for about 30 years I wondered if I could use the character in other situations One story had begun with a spark of truth a story my father had told many times about a foolish man he'd once known and the spirit of my father All the stories in the series walk that precarious tightrope between memoir and fiction I worked hard with the stories structure and a sort of old fashioned expository style to make them feel like memoir like truth Again James Togeas,2014-01-11 Repetition is the only form of permanence that nature can achieve says

philosopher George Santayana in his Soliloquies in England The rhythm of the novel Again is so to speak based on a pattern of three four and five There are three intertwined stories of repetition involving four men and five women The men are Greek Americans three brothers and their cousin Of the five women two are deceased when the novel's action begins The novel's action spans about half a year I have conflated days of the late 1940s and mid 1980s which permits the aging Greek immigrant community that I knew in the 1940s to be present for events occurring in the 1980s Back cover Twelve Weeks to Change a Life Max A. Greenberg,2019-01-08 Hailed as a means to transform cultural norms and change lives violence prevention programs signal a slow rolling policy revolution that has reached nearly two thirds of young people in the United States today Max A Greenberg takes us inside the booming market for programming and onto the asphalt campuses of Los Angeles where these programs are implemented many just one hour a week for 12 weeks He spotlights how these ephemeral programs built on troves of risk data are disconnected from the lived experiences of the young people they were created to support Going beyond the narrow stories told about at risk youth through data and in policy Greenberg sketches a vivid portrait of young men and women coming of age and forming relationships in a world of abiding harm and fleeting fragmented support At the same time Greenberg maps the minefield of historical and structural inequalities that program facilitators must navigate to build meaningful connections with the youth they serve Taken together these programs shape the stories and politics of a generation and reveal how social policy can go wrong when it ignores the lives of young people
