categorical distinction is drawn between popular and high literature Though still selective and not intended as an exhaustive catalogue the present survey covers a large number of titles Rather than resorting to broad and ultimately somewhat abstract thematic categories the contributors endeavour to keep control over this mass of material by applying a micro thematic taxonomy This approach well tested in the tradition of literary studies within France groups works analytically and evaluatively in terms of such categories as actional motifs plot frames and sociologically relevant locations or topics thereby enabling a clearer focus on the dynamics of preoccupation and tendency that form networks of affinity across the fiction produced in the period surveyed
