Friedberg, 1981 The first major treatment of the American art song in more than 40

years In Volume I America Comes of Age Friedberg examines the transition from the European influenced songs of MacDowell Loeffler and Griffes to the consciously American style of Ives Copland Harris and other 20th century composers Volume II Voices of Maturity treats composers born just before or after 1900 and their response to the flood of poetry by American writers in the early 20th century Volume III The Century Advances begins where its predecessor ended with composers born in the second decade of this century and discusses songs written roughly between 1940 and 1980 Among the 16 composers treated Samuel Barber Paul Bowles David Diamond Vincent Persichetti Jean Eichelberger Ivey Ned Rorem and Richard Hundley Among the 26 poets James Agee Tennessee Williams Herman Melville Wallace Stevens Stephen Crane Peter Viereck Theodore Roethke and James Purdy **The NATS Bulletin** National Association of Teachers of Singing (U.S.),1979

Catalog of Copyright Entries Library of Congress. Copyright Office,1971 *The Disciplines of Vocal Pedagogy: Towards an Holistic Approach* Karen Sell,2017-07-05 If classical singers and vocal pedagogues are to be prepared adequately for performance teaching and co operation in inter professional relations then an holistic education entailing multi disciplinary study is essential In this important new book Karen Sell examines the disciplines pertinent to vocal pedagogy tracing the lineage of views from the ancient world to the present day In the process important diverse roots are exposed yielding differing and even conflicting tonal ideals which have a bearing on the consideration of different singing methods and the interpretation of songs and arias Ethics and psychology are identified as central to the entire pedagogical process along with the scientific basis of singing encompassing acoustics anatomy and physiology with special reference to the bearing of the latter two upon vocal health and hygiene A detailed consideration of singing technique is the centrepiece of the book and an understanding of good technique and scientific awareness is shown to be fundamental to good vocal pedagogical practice This leads to a discussion on performance and aesthetics contributing to the education of the fully equipped singer No study to date has demonstrated the inter relationships between all these individual disciplines and the ways in which they influence singing pedagogy Sell s holistic multi disciplinary approach will be of particular benefit to singers and voice teachers and will also appeal to music educationalists and professionals in cognate disciplines

Sensibility and English Song Stephen Banfield,1985 This highly acclaimed study of English song is the first detailed account of an unusually fruitful interrelationship between English music and English poetry The period covered is known as the English Musical Renaissance and runs from the last years of the nineteenth century to the Second World War Stephen Banfield traces the late flowering of Romantic impulses in solo song during these years surveying it from critical analytical and historical angles He plots the growth of the English stylistic sensibility in song in the decades leading up to the First World War discusses in detail the plateau it reached between the wars particularly in the 1920s and shows how and why it declined as other musical concerns took the field Poets whose verse was set to music most frequently including Housman Hardy de la Mare and Yeats are treated at length as are pre eminent song composers such as Butterworth Finzi Gurney

Ireland Quilter Somervell Stanford Vaughan Williams and Warlock In all more than fifty composers are discussed and numerous individual songs In the final section of the book besides providing an extensive bibliography Dr Banfield catalogues over 5 000 songs giving dates of composition and publication and much other detail listed by composer This comprehensive survey will prove an invaluable reference guide to all students of the subject **German and Song 1740 - 1900** John Smeed,2020-01-30 Originally published in 1987 this volume charts the development of German song across a century and a half relating it both to poetry and to the cultural scene in Germany By emphasising genre rather than individual composers and while paying heed to acknowledged masterpieces by quoting extensively from forgotten composers the book avoids historical over simplification and arrives at a fuller picture of this rich tradition In so doing it uncovers much neglected material The book investigates the relationship between German poets and composers and their native folk tradition It further explores the interaction between convention and innovation and demonstrates how one poem can be interpreted quite differently by different composers The book is accessible both to students of literature and music Approaches to the American Musical Robert Lawson-Peebles,1996 This new analysis of American film and stage musicals puts forward the argument that productions such as Kiss Me Kate were popular because they dealt with important issues such as ethnicity rather than because of their value as escapism **The Cambridge Companion to the Lied** James Parsons,2004-07-01 Beginning several generations before Schubert the Lied first appears as domestic entertainment In the century that follows it becomes one of the primary modes of music making By the time German song comes to its presumed conclusion with Richard Strauss s 1948 Vier letzte Lieder this rich repertoire has moved beyond the home and keyboard accompaniment to the symphony hall This is a 2004 introductory chronicle of this fascinating genre In essays by eminent scholars this Companion places the Lied in its full context at once musical literary and cultural with chapters devoted to focal composers as well as important issues such as the way in which the Lied influenced other musical genres its use as a musical commodity and issues of performance The volume is framed by a detailed chronology of German music and poetry from the late 1730s to the present and also contains a comprehensive bibliography The Lyric Art of Pierre Perrin, Founder of French Opera Louis E. Auld,1986 Poetry into Song Deborah Stein,Robert Spillman,2010-06-10 Focusing on the music of the great song composers Schubert Schumann Brahms Wolf and Strauss Poetry Into Song offers a systematic introduction to the performance and analysis of Lieder **The Sense of Music** Raymond Monelle,2010-09-17 The fictional Dr Strabismus sets out to write a new comprehensive theory of music But music s tendency to deconstruct itself combined with the complexities of postmodernism doom him to failure This is the parable that frames The Sense of Music a novel treatment of music theory that reinterprets the modern history of Western music in the terms of semiotics Based on the assumption that music cannot be described without reference to its meaning Raymond Monelle proposes that works of the Western classical tradition be analyzed in terms of temporality subjectivity and topic theory Critical of the abstract analysis of musical scores Monelle

argues that the score does not reveal music's sense. That sense, what a piece of music says and signifies, can be understood only with reference to history, culture, and the other arts. Thus music is meaningful in that it signifies cultural temporalities and themes from the traditional manly heroism of the hunt to military power to postmodern polyvocality. This theoretical innovation allows Monelle to describe how the Classical style of the eighteenth century, which he reads as a balance of lyric and progressive time, gave way to the Romantic need for emotional realism. He argues that irony and ambiguity subsequently eroded the domination of personal emotion in Western music as well as literature, killing the composer's subjectivity with that of the author. This leaves Dr Strabismus suffering from the postmodern condition and Raymond Monelle with an exciting, controversial new approach to understanding music and its history.

German Lieder in the Nineteenth Century

Rufus Hallmark, 2009-09-10. German Lieder in the Nineteenth Century provides a detailed introduction to the German lied. Beginning with its origin in the literary and musical culture of Germany in the nineteenth century, the book covers individual composers including Schubert, Schumann, Brahms, Strauss, Mahler, and Wolf. The literary sources of lieder, the historical and conceptual issues of song cycles, and issues of musical technique and style in performance practice. Written by eminent music scholars in the field, each chapter includes detailed musical examples and analysis. The second edition has been revised and updated to include the most recent research of each composer and additional musical examples.
