**Prairie Dog Song** Susan L. Roth, Cindy Trumbore, 2016 For thousands of years green and gold grasses covered North America from Canada to Mexico The prairie and desert grasslands were home to a variety of animals from small prairie dogs to huge bison But in the nineteenth century ranching and farming took hold in the grasslands and over time many of the animals and plants vanished Then in the late 1980s scientists discovered a region in Mexico where green and gold grasses still waved and prairie dogs still barked The scientists understood the importance of this grassland ecosystem and the prairie dogs key role in it Could they now preserve the area and bring back its lost animals and plants This moving nonfiction tale of environmental recovery builds on the success of the acclaimed *Parrots Over Puerto Rico* and *The Mangrove Tree* Cumulative song text plus prose passages combine to celebrate North America's grasslands their iconic prairie dogs and the dedicated scientists who work to make the grasslands healthy again Comprehensive backmatter makes this book perfect for classroom use with text that hits both Science and Social Studies Common Core Standards Teacher's Guide available at [leeandlow.com](http://leeandlow.com)

**Ethnomusicology of the Flathead Indians** Alan Merriam, 2017-09-29 All people in no matter what culture must be able to place their music firmly in the context of the totality of their beliefs experiences and activities for without such ties music cannot exist This means that there must be a body of theory connected with any music system not necessarily a theory of the structure of music sound although that may be present as well but rather a theory of what music is what it does and how it is coordinated with the total environment both natural and cultural in which human beings move The Flathead Indians of Western Montana just over 26 000 in number as of the 2000 census inhabit a reservation consisting of 632 516 acres of land in the Jocko and Flathead Valleys and the Camas Prairie country which lie roughly between Evaro and Kalispell Montana The reservation is bounded on the east by the Mission Range on the west by the Cabinet National Forest on the south by the Lolo National Forest and on the north by an arbitrary line approximately bisecting Flathead Lake about twenty four miles south of Kalispell The area is one of the richest agricultural regions in Montana and fish and game are abundant The Flathead are engaged in stocking timbering and various agricultural enterprises For the Flathead the most important single fact about music and its relationship to the total world is its origin in the supernatural sphere All true and proper songs particularly in the past owe their origin to a variety of contacts experienced by humans with beings which though a part of this world are superhuman and the source of both individual and tribal powers and skills Thus a sharp distinction is drawn by the Flathead between what they call make up and all other songs Merriam's pioneering work in the relationship of ethnography and musicology remains a primary source in this field in anthropology **Super Dog Tricks** Sara Carson, 2021-11-02 You've
