Mother Stories Maud Lindsay, 2024-11-23 Mother a Story at the right time Is a Looking glass for the Mind Froebel Endeavored to write for mothers and dear little children a few simple stories embodying some of the truths of Froebel's Mother Play The Mother Play is such a vast treasure house of Truth that each one who seeks among its stores may bring to light some gem and though perhaps I have missed its diamonds and rubies I trust my string of pearls may find acceptance with some mother who is trying to live with her children I have written my own mottoes with a few exceptions that I might emphasize the particular lesson which I endeavor to teach in the story for every motto in the Mother Play comprehends so much that it is impossible to use the whole for a single subject From The Bridge for instance which is replete with lessons I have taken only one for the story of the Little Traveler

Fifty Famous Stories Retold James Baldwin, 2024-11-24 THERE are numerous time honored stories which have become so incorporated into the literature and thought of our race that a knowledge of them is an indispensable part of one's education These stories are of several different classes To one class belong the popular fairy tales which have delighted untold generations of children and will continue to delight them to the end of time To another class belong the limited number of fables that have come down to us through many channels from hoar antiquity To a third belong the charming stories of olden times that are derived from the literatures of ancient peoples such as the Greeks and the Hebrews A fourth class includes the half legendary tales of a distinctly later origin which have for their subjects certain romantic episodes in the lives of well known heroes and famous men or in the history of a people It is to this last class that most of the fifty stories contained in the present volume belong As a matter of course some of these stories are better known and therefore more famous than others Some have a slight historical value some are useful as giving point to certain great moral truths others are products solely of the fancy and are intended only to amuse Some are derived from very ancient sources and are current in the literature of many lands some have come to us through the ballads and folk tales of the English people

Four Stories of the Schrodinger's Cat Murat Ugray, 2024-11-24 She is both dead and alive according to some left brains But I want to give you the story of what we can learn from this for everyday life and for our work with the daily nature philosophical system As you know I was the first that told the world that all the new systems that give themselves very good sounding names like Quantum worlds theories or Nonlinear or Discrete physics systems are all random number generators including Now what is missing in our culture is an appreciation for the Uncertain but that this will be the foundation of a new science and that is what we are doing here For about one hundred years the uncertainty principle has been reconfirmed in hundreds of experiments which simply says you cannot measure all parameters

like coordinates impulse and so on of atomic particles with any desired accuracy but that there is a limit given by the Heisenberg formula Why has such a tiny matter kept so many brains spinning for such a long time what is in question here are quantities in the range of 1 billions of a meter and 1 billions of a second so who and why care We all know or should know that uncertainty is a common factor in our life and we try to escape it with so much pretense and insurances This is why the discovery that uncertainty is even part of the most simple processes is making so much wind for such a long time And of course there are those simple minds like Einstein who hold that the Uncertainty principle is only the result of the fact that we do not know all the details he called them the hidden Parameters and once we know them voila no more uncertainty all is calculatable down to the last digit Simply our common hope believe imagination that at the basis there is a really real reality that is unmistakable one way or the other The cat is either alive or dead I don t want to bore you with the over and over told stories of the wave particle duality and Schroedinger s cat May be there are hundreds of books that do this But I tell you a different and deeply story so relation to the paralel universe that contain from ancient Upanishads to modern String theory and beyond with simply forming Four Equations and Four Stories The Golden Age and Other Stories (With Grahame Biography) Paul Brody,Kenneth Grahame,2015-03-05 The Golden Age is a collection of reminiscences of childhood written by Kenneth Grahame Typical of his culture and his era Grahame casts his reminiscences in imagery and metaphor rooted in the culture of Ancient Greece This edition also includes a biography of the books author Kenneth Grahame **The Art of History** John Bennett Black,1926 **A History of Art for Beginners and Students** Clara E. Clement,2024-11-24 ARCHITECTURE seems to me to be the most wonderful of all the arts We may not love it as much as others when we are young perhaps we cannot do so because it is so great and so grand but at any time of life one can see that in Architecture some of the most marvellous achievements of men are displayed The principal reason for saying this is that Architecture is not an imitative art like Painting and Sculpture The first picture that was ever painted was a portrait or an imitation of something that the painter had seen So in Sculpture the first statue or bas relief was an attempt to reproduce some being or object that the sculptor had seen or to make a work which combined portions of several things that he had observed but in Architecture this was not true No temples or tombs or palaces existed until they had first taken form in the mind and imagination of the builders and were created out of space and nothingness so to speak Thus Painting and Sculpture are imitative arts but Architecture is a constructive art and while one may love pictures or statues more than the work of the architect it seems to me that one must wonder most at the last We do not know how long the earth has existed and in studying the most ancient times of which we have any accurate knowledge we come upon facts which prove that men must have lived and died long before the dates of which we can speak exactly The earliest nations of whose Architecture we can give an account are called heathen nations and their art is called Ancient or Heathen Art and this comes down to the time when the Roman Emperor Constantine was converted to Christianity and changed the Roman Capitol from Rome to

Constantinople in the year of our Lord 328 The buildings and the ruins which still remain from these ancient times are in Egypt Assyria Persia Judea Asia Minor Greece Etruria and Rome Many of these have been excavated or uncovered as during the ages that have passed since their erection they had been buried away from sight by the accumulation of earth about them These excavations are always going on in various countries and men are ever striving to learn more about the wonders of ancient days and we may hope that in the future as marvellous things may be revealed to us as have been shown in the past EGYPT As we consider the Architecture of Egypt the Great Pyramid first attracts attention on account of its antiquity and its importance This was built by Cheops who is also called Suphis about 3000 years before Christ At that distant day the Egyptians seem to have been a nation of pyramid builders for even now after all the years that have rolled between them and us we know of more than sixty of these mysterious monuments which have been opened and explored Of all these the three pyramids at Ghizeh are best known and that of Cheops is the most remarkable among them Those of you who have studied the history of the wars of Napoleon I will remember that it was near this spot that he fought the so called Battle of the Pyramids and that in addressing his soldiers he reminded them that here the ages looked down upon them thus referring to the many years during which this great pyramid had stood on the border of the desert as if watching the flight of Time and calmly waiting to see what would happen on the final day of all earthly things There have been much speculation and many opinions as to the use for which these pyramids were made but the most general belief is that they were intended for the tombs of the powerful kings who reigned in Egypt and caused them to be built The pyramid of Cheops was four hundred and eighty feet and nine inches high and its base was seven hundred and sixty four feet square It is so difficult to understand

A Dog's Tale Mark Twain,2024-11-24 SOON the master stopped discussing a moment and rang in the footman and said Bury it in the far corner of the garden and then went on with the discussion and I trotted after the footman very happy and grateful for I knew the puppy was out of its pain now because it was asleep We went far down the garden to the farthest end where the children and the nurse and the puppy and I used to play in the summer in the shade of a great elm and there the footman dug a hole and I saw he was going to plant the puppy and I was glad because it would grow and come up a fine handsome dog like Robin Adair and be a beautiful surprise for the family when they came home so I tried to help him dig but my lame leg was no good being stiff you know and you have to have two or it is no use When the footman had finished and covered little Robin up he patted my head and there were tears in his eyes and he said Poor little DOGGIE you saved HIS child

and efficient cause the attribute of intelligence The mind of the deepest philosopher is thus acted upon equally with that of the peasant or the savage the only difference lies in the nature of the intelligent cause at which they respectively stop The one pursues the chain of cause and effect and traces out its various links till he arrives at the great intelligent cause of all however he may designate him the other when unusual phenomena excite his attention ascribes their production to the immediate agency of some of the inferior beings recognised by his legendary creed The action of this latter principle must forcibly strike the minds of those who disdain not to bestow a portion of their attention on the popular legends and traditions of different countries Every extraordinary appearance is found to have its extraordinary cause assigned a cause always connected with the history or religion ancient or modern of the country and not unfrequently varying with a change of faith

Inventions of the Great War Alexander Russell Bond, 2024-11-24 The great World War was more than two thirds over when America entered the struggle and yet in a sense this country was in the war from its very beginning Three great inventions controlled the character of the fighting and made it different from any other the world has ever seen These three inventions were American The submarine was our invention it carried the war into the sea The airplane was an American invention it carried the war into the sky We invented the machine gun it drove the war into the ground It is not my purpose to boast of American genius but rather to show that we entered the war with heavy responsibilities The inventions we had given to the world had been developed marvelously in other lands Furthermore they were in the hands of a determined and unscrupulous foe and we found before us the task of overcoming the very machines that we had created Yankee ingenuity was faced with a real test The only way of overcoming the airplane was to build more and better machines than the enemy possessed This we tried to do but first we had to be taught by our allies the latest refinements of this machine and the war was over before we had more than started our aerial program The machine gun and its accessory barbed wire also an American invention were overcome by the tank and we may find what little comfort we can in the fact that its invention was inspired by the sight of an American farm tractor But the tank was a British creation and was undoubtedly the most important invention of the war On the sea we were faced with a most baffling problem The U boat could not be coped with by the building of swarms of submarines The essential here was a means of locating the enemy and destroying him even while he lurked under the surface Two American inventions the hydrophone and the depth bomb made the lot of the U boat decidedly unenviable and they hastened if they did not actually end German frightfulness on the sea But these were by no means the only inventions of the war Great Britain showed wonderful ingenuity and resourcefulness in many directions France did marvels with the airplane and showed great cleverness in her development of the tank and there was a host of minor inventions to her credit while Italy showed marked skill in the creation of large airplanes and small seacraft *The Orange Fairy Book* Andrew Lang, 2024-11-23 The children who read fairy books or have fairy books read to them do not read prefaces and the parents aunts uncles and cousins who give fairy books to their daughters nieces and cousins leave prefaces

unread For whom then are prefaces written When an author publishes a book out of his own head he writes the preface for his own pleasure After reading over his book in print to make sure that all the u s are not printed as n s and all the n s as u s in the proper names then the author says mildly in his preface what he thinks about his own book and what he means it to prove if he means it to prove anything and why it is not a better book than it is But perhaps nobody reads prefaces except other authors and critics who hope that they will find enough in the preface to enable them to do without reading any of the book This appears to be the philosophy of prefaces in general and perhaps authors might be more daring and candid than they are with advantage and write regular criticisms of their own books in their prefaces for nobody can be so good a critic of himself as the author if he has a sense of humour If he has not the less he says in his preface the better These Fairy Books however are not written by the Editor as he has often explained out of his own head The stories are taken from those told by grannies to grandchildren in many countries and in many languages French Italian Spanish Catalan Gaelic Icelandic Cherokee African Indian Australian Slavonic Eskimo and what not The stories are not literal or word by word translations but have been altered in many ways to make them suitable for children FAIRIES The Story of the Hero Makoma The Magic Mirror Story of the King Who Would See Paradise How Isuro the Rabbit Tricked Gudu Ian the Soldier s Son The Fox and the Wolf How Ian Direach Got the Blue Falcon The Ugly Duckling The Two Caskets The Goldsmith s Fortune The Enchanted Wreath The Foolish Weaver The Clever Cat The Story of Manus Pinkel the Thief The Adventures of a Jackal The Adventures of the Jackal s Eldest Son The Adventures of the Younger Son of the Jackal The Three Treasures of the Giants The Rover of the Plain The White Doe The Girl Fish The Owl and the Eagle The Frog and the Lion Fairy The Adventures of Covan the Brown Haired The Princess Bella Flor The Bird of Truth The Mink and the Wolf Adventures of an Indian Brave How the Stalos Were Tricked Andras Baive The White Slipper The Magic Book **Fairy Tales from Spain** J.
