Almadro, Mikaella Evaristo, 2018-02-16 Raul P Lejano offers a boldly original synthesis of narratology psychology and human geography This helps him articulate his two main insights that our identity as individuals though not completely determined by sociocultural

factors nevertheless profoundly reflects our embeddedness in particular places and that the way we think of or would like to think of our own identity is most readily captured in the stories we tell about ourselves Most revealing of all he suggests are our stories about coming to grips with an entire city especially when our experience of it is actually one of dislocation or relocation when we in some sense or other lose a city to which we have hitherto belonged or when we find a new one By way of illustration the book includes four specially commissioned autobiographical stories by writers of Filipino origin which Lejano s analytical chapters compare and contrast with each other within his interdisciplinary frame of reference At once learnedly sophisticated and readably empathetic his commentaries are underpinned by a basically phenomenological orientation which leads him to view human individuals as essentially relational beings naturally inclined to enter into dialogue with both their fellow creatures and the larger environment

**Selves and Identities in Narrative and Discourse**

Michael G. W. Bamberg,Anna De Fina,Deborah Schiffrin,2007 The different traditions that have inspired the contributors to this volume can be divided along three different orientations one that is rooted predominantly in sociolinguistics a second that is ethnomethodologically informed and a third that came in the wake of narrative interview research All three share a commitment to view self and identity not as essential properties of the person but as constituted in discursive practices and particularly in narrative Moreover since self and identity are held to be phenomena that are contextually and continually generated they are defined and viewed in the plural as selves and identities In the attempt of moving closer toward a process oriented approach to the formation of selves and identities this volume sets the stage for future discussions of the role of narrative and discourse in this generation process and for how a close analysis of these processes can advance an understanding of the world around us and within this world of identities and selves
