Picturing Worlds David Stirrup, 2020-05-01 Paying attention to the uses that Anishinaabe authors make of visual images and marks made on surfaces such as rock bark paper and canvas David Stirrup argues that such marks whether ancient pictographs or contemporary paintings intervene in artificial divisions like that separating precolonial oral from postcontact alphabetically literate societies Examining the ways that writers including George Copway Jane Johnston Schoolcraft Gordon Henry Louise Erdrich Gerald Vizenor and others deploy the visual establishes frameworks for continuity resistance and sovereignty in that space where conventional narratives of settlement read rupture This book is a significant contribution to studies of the ways traditional forms of inscription support and amplify the oral tradition and in turn how both the method and aesthetic of inscription contribute to contemporary literary aesthetics and the politics of representation

Cartographies of Travel and Navigation James R. Akerman, 2010-11-15 Finding one's way with a map is a relatively recent phenomenon In premodern times maps were used if at all mainly for planning journeys in advance not for guiding travelers on the road With the exception of navigational sea charts the use of maps by travelers only became common in the modern era indeed in the last two hundred years maps have become the most ubiquitous and familiar genre of modern cartography Examining the historical relationship between travelers navigation and maps Cartographies of Travel and Navigation considers the cartographic response to the new modalities of modern travel brought about by technological and institutional developments in the twentieth century Highlighting the ways in which the travelers operators and planners of modern transportation systems value maps as both navigation tools and as representatives of a radical new mobility this collection brings the cartography of travel by road sea rail and air to the forefront placing maps at

the center of the history of travel and movement Richly and colorfully illustrated Cartographies of Travel and Navigation ably fills the void in historical literature on transportation mapping      **A Teacher's Manual Accompanying the**
