With an Introd. by Sir Maurice Powicke and a Foreword by Georges Altman. Translated from the French By Gerard Hopkins Marc Bloch, 1968      1939 Michael Jabara Carley, 2009-02-16 At a crucial point in the twentieth century as Nazi Germany prepared for war negotiations between Britain France and the Soviet Union became the last chance to halt Hitler's aggression Incredibly the French and British governments dallied talks failed and in August 1939 the Soviet Union signed a nonaggression pact with Germany Michael Carley's gripping account of these negotiations is not a pretty story It is about the failures of appeasement and collective security in Europe It is about moral depravity and blindness about villains and cowards and about heroes who stood against the intellectual and popular tides of their time Some died for their beliefs others labored in obscurity and have been nearly forgotten In 1939 they sought to make the Grand Alliance that never was between France Britain and the Soviet Union This story of their efforts is background to the wartime alliance created in 1941 without France but with the United States in order to defeat a demonic enemy 1939 is based upon Mr Carley's longtime research on the period including work in French British and newly opened Soviet archives He challenges prevailing interpretations of the origins of World War II by situating 1939 at the end of the early cold war between the Soviet Union France and Britain and by showing how anti communism was the major cause of the failure to form an alliance against Hitler 1939 was published on September 1 the sixtieth anniversary of the Nazi invasion of Poland and the start of the war

fully investigated National Resilience during War Refining the Decision Making Model by Eyal Lewin searches for the mechanisms of national resilience through a deep inquiry into nine different case studies taken from the scenery of World War II Following a multi disciplinary attitude a business management model is adopted the PEST and SWOT model and political economic social and military technological factors are analyzed for each of the case studies The result is a comprehensive political decision making model on a national level that can serve as a means for leaders to navigate successfully in geopolitical turbulence as well as for social scientists to better understand the defeats that different countries suffer and the victories that others demonstrate This research however goes further by refining the model and pointing to the exact combination of factors that are crucial for a nation s ability to win its wars Using a qualitative comparative analysis technique the exact combination is traced The results emphasize that the winning scheme blends political and social factors together leadership positive psychology and an inspiring national ethos prove to be a necessary though not a sufficient conditional combination for success National Resilience during War fills a significant gap in the literature on the politics of war

*The Fall of France in the Second World War* Richard Carswell,2019-02-01 This book examines how the fall of France in the Second World War has been recorded by historians and remembered within society It argues that explanations of the fall have usually revolved around the four main themes of decadence failure constraint and contingency It shows that the dominant explanation claimed for many years that the fall was the inevitable consequence of a society grown rotten in the inter war period This view has been largely replaced among academic historians by a consensus which distinguishes between the military defeat and the political demise of the Third Republic It emphasizes the contingent factors that led to the military defeat At the same time it seeks to understand the constraints within which France s policy makers were required to act and the reasons for their policy making failures in economics defence and diplomacy

**War of Words** Rachel Chin,2022-07-21 Analyses the imperial clashes in the Franco

British relationship during the Second World War      On the Edge of Democracy Rosario Forlenza, 2018-10-25

On the Edge of Democracy examines the emergence of democracy in Italy in the wake of World War Two. It examines the nature of the democracy forged in the liminal period after Benito Mussolini, the Duce of Fascism, was removed from government in the summer of 1943. Instead of pouring through institutional accounts which root the origins of democracy in the establishment of parties and in electoral outcomes, Forlenza focuses on the lived experiences of ordinary people and elites in extraordinary times. Meanings of democracy are not variations of a universal model but emerge as contingent interpretative acts and a symbolization following political and existential crisis under condition of violence and war. On the Edge of Democracy captures a series of key events which saw people torn between going home or staying at the front, between clinging to a disrespected but habitual monarchy or engaging with a republican experiment. Becoming a democracy was also a kind of politically spiritual act: the power of the myth of America and the struggle for order as a function of the cosmic fight between communism and anti-communism in the incipient Cold War had a formative power on the origins, meanings and characters of post-fascist democracy in Italy.
