eugenics the science of racial improvement melded evolutionary biology and incipient genetics with long standing cultural racism The resulting theories taught to generations of Virginia high school college and medical students became social policy as Virginia legislators passed eugenic marriage and sterilization statutes The enforcement of these laws victimized men and women labeled feeble-minded African Americans and Native Americans for over forty years However this is much more than the story of majority agents dominating minority subjects Although white elites were the first to champion eugenics by the 1910s African American Virginians were advancing their own hereditarian ideas creating an effective counter narrative to white scientific racism Ultimately segregation's science contained the seeds of biological determinism's undoing realized through the civil women's Native American and welfare rights movements Of interest to historians educators biologists physicians and social workers this study reminds readers that science is socially constructed the syllogism Science is objective objective things are moral therefore science is moral remains as potentially dangerous and misleading today as it was in the past
