New Views on an Old Planet Tjeerd H. van Andel, 1994-10-28 In this 1994 revised edition of his award winning book on the Earth s history Professor van Andel updates and expands his earlier text drawing on a wealth of new knowledge that has become available in the last decade This book examines the major changes in the Earth s history the evolution of the solid Earth the changing oceans and atmospheres and the progression of life to render a historical account of the Earth s evolution Much knowledge was gained in the previous decade and while little material has been deleted this new edition has grown to cover the key topics including a chapter on how we can improve our grasp on geological time Mindful of the current interest in global change new sections describe the green house effect and address its possible future ramifications In prose that is both concise and compelling New Views on an Old Planet A History of Global Change makes Earth history appealing to the general reader It will serve as an excellent text for introductory courses in the earth and environmental sciences

Sea Changes Bernhard Klein, Gesa Mackenthun, 2012-08-21 The sea has been the site of radical changes in human lives and national histories It has been an agent of colonial oppression but also of indigenous resistance a site of loss dispersal and enforced migration but also of new forms of solidarity and affective kinship *SeaChanges* re evaluates the view that history happens mainly on dry land and makes the case for a creative reinterpretation of the role of the sea not merely as a passage from one country to the next but a historical site deserving close study
