ALONE WITH A STRANGER

Stranger Alone

Philip Beitchman

Stranger Alone:

A Child Alone with Strangers Philip Fracassi, 2022-10-25 Fracassi's novel hits me like a cross between McCammon and 80s King. Might be one of them summer blockbusters readers love. Laird Barron author of *Worse Angels*. *A Child Alone with Strangers* starts out as a slow burn procedural with supernatural elements and inexorably cranks itself into a pulse pounding symphony of eldritch horrors and all too human violence. Philip Fracassi is the best sort of horror writer, one who is unafraid to hunt for light in even the darkest places. Shaun Hamill author of *A Cosmology of Monsters*. When young Henry Thorne is kidnapped and held prisoner in a remote farmhouse surrounded by miles of forest, he finds himself connecting with a strange force living in the woods, using that bond to wreak havoc against his captors. Unknown to the boy, however, is that this ancient being has its own reasons for wanting the interlopers gone. There is something hidden beneath the house tucked away in the dark, damp root cellar, waiting for its return.

Stranger on a Train Jenny Diski, 2003-09 Using two cross country trips on Amtrak as her narrative vehicles, British writer Jenny Diski connects the humming rails taking her into the heart of America with the track-like scars leading back to her own past. As in the highly acclaimed *Skating to Antarctica*, Diski has created a seamless and seemingly effortless amalgam of reflections and revelation in a unique combination of travelogue and memoir.

The Stranger's Touch Donald E. Mackay, 2014-01-20 This book has been called short story fiction literature. The stories cover a wide range of genres. It contains a bit of soft science fiction, easy philosophy, and several intense love stories. If the question should come up in conversation as to why one should not tempt the Creator, this story *The Stranger's Touch* will offer a very good reason why you should avoid that action like the black plague. This love story *A Desert Blooms* proves love can bloom anywhere, even in the middle of a war zone. This next story is about an engagement ring found on a country road, and it opens a story about one man who died in war and one man who lived, and the woman who lost the ring. The two men were on the same bomber that was shot down over France. Another story offers the horror for a man who was convicted of murder and sent to prison for life; he's innocent but he cannot prove it, and he decides to escape. A reporter tells this story with a good deal of empathy. It was a heart-rending tale of sorrow and frustration. The Creator moves in all these stories.

When You're by Yourself, You're Alone Eugene McKinney, 1974 ***Living Alone*** Stella Benson, 2022-05-28 In *Living Alone*, Stella Benson presents a vivid exploration of the themes of independence and isolation through the lens of a young woman navigating the complexities of single life in early 20th century England. The novel is characterized by its lyrical prose and introspective style, weaving a tapestry of emotions as the protagonist confronts societal expectations, personal aspirations, and the nuances of solitary existence. Benson's work is a potent reflection of the changing dynamics of gender roles during the interwar period, intelligently critiquing the conventions of domesticity while simultaneously celebrating autonomy and self-discovery. Stella Benson, an early feminist and accomplished writer, was influenced by her own experiences of traveling and living in various cultures, shaping her perspective on individuality and societal norms. Her background as a suffragist and her

keen observations of contemporary issues concerning women in society inform her narrative providing depth and authenticity to the character's journey Benson's commitment to highlighting the struggle for women's independence resonates throughout her work marking her as a significant voice in literature *Living Alone* is a profound examination of solitude and personal strength making it a must read for those interested in feminist literature and character driven narratives Readers will find themselves captivated by Benson's insightful portrayal of life's complexities inviting them to reflect on their own experiences of independence and belonging

Alone Time Stephanie Rosenbloom, 2019-06-04 A wise passionate account of the pleasures of traveling solo In our hectic hyperconnected lives many people are uncomfortable with the prospect of solitude Yet a little time to ourselves can be an opportunity to slow down savor and try new things especially when traveling Through on the ground reporting insights from social science and recounting the experiences of artists writers and innovators who cherished solitude Stephanie Rosenbloom considers how traveling alone deepens appreciation for everyday beauty bringing into sharp relief the sights sounds and smells that one isn't necessarily attuned to in the presence of company Walking through four cities Paris Florence Istanbul and New York and four seasons *Alone Time* gives us permission to pause to relish the sensual details of the world rather than hurtling through museums and uploading photos to Instagram In chapters about dining out visiting museums and pursuing knowledge we begin to see how the moments we have to ourselves on the road or at home can be used to enrich our lives Rosenbloom's engaging and elegant prose makes *Alone Time* as warmly intimate an account as the details of a trip shared by a beloved friend and will have its many readers eager to set off on their own solo adventures

Mother Media Hannah Zeavin, 2025-04-29 An essential history for understanding how we mother now and how motherhood itself became a medium winner of the Brooke Hindle Award from the Society for the History of Technology From the nursery to the prison from the clinic to the commune *Mother Media* tells the story of how we arrived at our contemporary understanding of what a mother is and how understandings of bad mothering formed our contemporary panics about bad media In this book leading historian of psychology Hannah Zeavin examines twentieth century pediatric psychological educational industrial and economic norms around mediated mothering and technologized parenting The book charts the crisis of the family across the twentieth century and the many ingenious attempts to remediate nursemaid and mother via speculative technologies and screen media Growing out of her previous award winning book *The Distance Cure* which considered technologized care the book lays bare the contradictions of techno parenting and how it relates to conceptions of maternal fitness medical redlining and surveillance of children parents and other caregivers The author offers narratives of parenting in its extremity for example Shaken Baby Syndrome and its ostensible banality for example the Nanny Cam and how the two are often intertwined Ultimately Zeavin grapples with a simple contradiction technology is seen and judged as harmful in domestic and educational spaces even as it is a saving grace in the unending labor of raising a family

Who Am I Now That I Am Alone? A Journey Back after Divorce or Death
James L Ramsey, 2014-08-13

The Who Am I Now That I Am Alone program began after my divorce I gathered others who had experienced divorce into a group to explore our situation and how we could move forward with our lives This group became one of the first in the country to help people going through divorce remember in the 70 s there still was not a great deal of acceptance of divorce in the culture Hundreds of people have experienced the program that was developed after the first group and have found it very helpful Over the years people have asked to read the book but it was a group process guide and not a narrative This book translates most of the program s material which was designed for group interaction into a format that will allow those who have experienced loss through divorce or death to benefit from the program on their own Chapters 1 3 concern communication including communicating and understanding feelings We can only develop meaningful relationships through effective communication These chapters also work on improving both interpersonal communication skills and your internal self talk communication Chapters 4 6 focus on understanding the importance of personal relationships in our lives guiding readers to move out and expand and deepen supportive relationships These are important skills for enriching the quality of anyone s life Finally Chapters 7 8 are designed to help readers develop a more positive personal identity Many people come out of a divorce or the loss of a relationship feeling like a failure and somewhat worthless These chapters reintroduce readers to their authentic selves Your authentic self has so many good qualities which when recognized and affirmed will offset the feelings of guilt and failure This change in perspective will bring the motivation to leave the past behind and build a new and exciting life

Investigating the Role of Emotions, Self-Centered Motives, and Social Norms* Corrado Corradi-Dell'Acqua,Leonie Koban,Susanne Leiberger,Patrik Vuilleumier,Ernst Fehr,2016-09-28 Human behavior and decision making is subject to social and motivational influences such as emotions

norms and self other regarding preferences The identification of the neural and psychological mechanisms underlying these factors is a central issue in psychology behavioral economics and social neuroscience with important clinical social and even political implications However despite a continuously growing interest from the scientific community the processes underlying these factors as well as their ontogenetic and phylogenetic development have so far remained elusive In this Research Topic we collect articles that provide challenging insights and stimulate a fruitful controversy on the question of what determines social behavior Indeed over the last decades research has shown that introducing a social context to otherwise abstract tasks has diverse effects on social behavior On the one hand it may induce individuals to act irrationally for instance to refuse money but on the other hand it improves individuals reasoning in that formerly difficult abstract problems can be easily solved These lines of research led to distinct although not necessarily mutually exclusive models for socially driven behavioral changes For instance a popular theoretical framework interprets human behavior as a result of a conflict between cognition and emotion with the cognitive system promoting self interested choices and the emotional system triggered by the social context operating against them Other theories favor social norms and deontic heuristics in biasing human reasoning and encouraging choices that are sometimes in conflict with one s interest Few studies attempted to disentangle between these as well as other models As a consequence although insightful results arise from specific domains tasks a comprehensive theoretical framework is still missing Furthermore studies employing neuroimaging techniques have begun to shed some light on the neural substrates involved in social behavior implicating consistently although not exclusively portions of the limbic system the insular and the prefrontal cortex In this context a challenge for present research lies not only in further mapping the brain structures implicated in social behavior or in describing in detail the functional interaction between these structures but in showing how the implicated networks relate to different theoretical models This is Research Topic hosted by members of the Swiss National Center of Competence in Research Affective Sciences Emotions in Individual Behaviour and Social Processes We collected contributions from the international community which extended the current knowledge about the psychological and neural structures underlying social behavior and decision making In particular we encouraged submissions from investigators arising from different domains psychology behavioral economics affective sciences etc implementing different techniques behavior electrophysiology neuroimaging brain stimulations on different populations neurotypical adults children brain damaged or psychiatric patients etc Animal studies are also included as the data reported are of high comparative value Finally we also welcomed submissions of meta analytical articles mini reviews and perspective papers which offer provocative and insightful interpretations of the recent literature in the field
